PurpleUp™, BufferPlus™, AquaBiotic™, PhosBuster™ Pro, and more!

## About our Company

### Serious Fun

Aquariums are more than just a great hobby. They may be the last fall-safe against serious global biodiversity loss. Coupled with intense breeding and propagation efforts, these captive environments represent an effective dispersion of genetic material to all corners of the globe when native environments are threatened. Since every home aquarium is a potential life raft, quality and sustainability are more important than ever.

Since 1972, CaribSea has supplied product to virtually every major public aquarium, marine zoo, aquaculture facility, public and private institution as well as hundreds of thousands of dedicated hobbyists worldwide. CaribSea's substrates are as precisely engineered as any piece of advanced equipment used by today's aquarists with task-specific mineralogy, sub-millimeter grading and advanced coatings as standard. CaribSea products are the chemical support and biological filtration backbone for many of the most spectacular aquatic displays ever created.

*Richard M. Greenfield*  
President  
CaribSea Inc.

We have added some additional data into this version of the catalog. After each substrate's name, you will notice a set of numbers in **white**; the first set of numbers is the average grain size distribution, the second number is the average density in pounds per cubic foot. We hope you find this additional data useful.

To calculate your substrate volume measure your footprint (Length x Width) in inches, then multiply that number by your desired substrate depth in inches. Divide your result by 1728. This is the number of cubic feet of material you need for your application. You can then use the density figure listed by each substrate by multiplying your final result by the density figure - this will give you the total number of pounds for your application.

### Example:

We want to use **Arag-Alive!** Bimini Pink, listed to the right, for our 125 gallon aquarium. We measure the length as 70 inches, and the width front to back as 18 inches (70 x 18 = 1260). We have decided to run our substrate at 2 inches of depth (1260 x 2 = 2520). We then divide that total by 1728 (the number of cubic inches in a cubic foot), 2520/1728=1.458. We note the density listed for **Arag-Alive!** Bimini Pink in the specifications next to its name (3.0 - 5.5mm | 72#/ft) is 72 pounds/cubic foot so we multiply our final result by 72 (1.458 x 72 = 104.97 pounds). We can now determine we would need 5 twenty pound bags and 1 ten pound bag, or rounding up 6 twenty pound bags of substrate for this example.

We hope this helps.

Sincerely,

The CaribSea Team

## Marine Live Sands

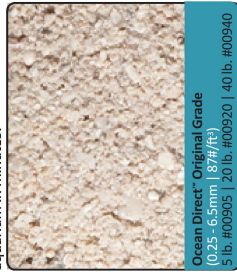

**Arag-Alive!**™ - You can now bring the world's most exotic reefs into your home with CaribSea's Arag-Alive!™ substrates. Eight environmentally accurate ecosystems, developed from CaribSea's cooperation with public aquariums and zoological parks where authenticity is a must, Arag-Alive!™ makes any aquarium uniquely yours.

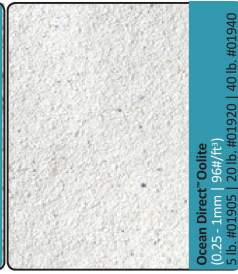

Arag-Alive!™ makes it easy to set up an aquarium. It's ready to work, clears quickly, and contains millions of live bacteria to cycle super fast and create natural biological balance. Arag-Alive!™ suppresses the dreaded "new tank syndrome", compresses the ammonia cycle, and discourages nuisance algae. In fact, independent labs prove Arag-Alive!™ cycles days faster than other brands of live sand. That's what makes Arag-Alive!™ the choice of new aquarists and maintenance companies where speed of set up, beauty, and stability are demanded.

is different than all other live sand products on the market. Ocean Direct™ utilizes "Sea Breathe"™ technology, which preserves real live sand with its own original bacteria. Every breathable bag of Ocean Direct™ is alive with up to 1000 times more beneficial bacteria than other preservation methods. Every grain of Ocean Direct™ is coated with bacteria and encapsulated by capillary action in a thin film of real ocean water. The thin film is open to the atmosphere for unparalleled gas exchange. This results in high counts of natural and beneficial bacteria with no noxious buildup of metabolic by-products. Ocean Direct™ provides you with a thriving, natural aquarium in minutes!

Ocean Direct™ Original Grade (0.25 - 6.5mm | 87#/ft)

5 lb. #01905 | 20 lb. #01920 | 40 lb. #01940

## Contact Us

## Notes

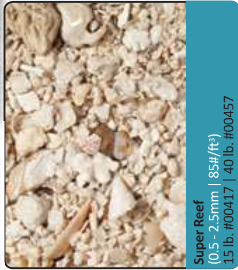

**Dry Aragonite Substrates** - Recognized worldwide for their purity and precision. Our substrates are purposely engineered and free of impurities such as ash, metals, pesticides, and silica; which allows you to create a safe and beautiful environment for your fish and invertebrates.

**CORALine™** - Natural dramatic colors and textures combined with pH support characterize our Coraline™ and Seaflo™ products. These are coarser materials suitable for most undergravel filtration and fish systems or as an accent for finer sands anywhere where elevated pH values are desirable. Consider the Coraline™ products in brackish or Cichlid aquariums (Central American or African).

**Seaflo™** - Puka Shell substrates are great additions to fine sands in reef tanks where animals make their homes by burrowing in the substrate. Jawfish, blennies and burrowing crustaceans will especially appreciate the extra "construction material." Our substrates are purposely engineered and free of impurities such as ash, metals, pesticides, and silica; which allows you to create a safe and beautiful environment for your fish and invertebrates. Precision grading makes system design a breeze!

**Super Reef**  
(0.5 - 2.5mm | 85#/ft<sup>3</sup>)  
15 lb. #00417 | 40 lb. #00457

15 lb. #00418 | 44 lb. #00444

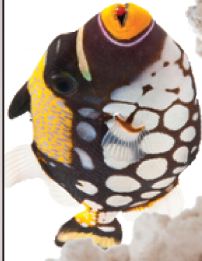

**Maui Wowie**  
(3.0 - 5mm | 80#/ft<sup>3</sup>)  
20 lb. #00902

**Reef Rock** - A great addition to fish or reef tanks. Actual petrified coral! Reef Rock retains excellent coral texture and is ideal for use as an economical base rock on which to attach invertebrates such as anemones, soft and hard corals, etc. Clean and pure, not bleached or chemical treated. 50 lb. box #00350 | 5-6 lb. Net bag 00306

**Primo Reef Rock** - The ultimate rock for marine, reef, or African Cichlid ecosystems. Packed with holes and textures, and incredibly porous, you can't get any better rock than this! It has great color too, not too white, not too dark, and takes coralline algae growth beautifully. The free forms lock together nicely for stability, and because its natural rock, each piece is uniquely yours. Forget the plastic stuff! Nothing tops mother nature, and nothing tops new Primo Reef Rock! 40 lb. box #00365

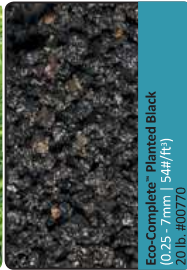

**South Seas Base Rock** - Natural weathering processes form the fantastic shapes of South Seas Base Rock by the erosion and pitting of limestone over the course of eons. It is clean and safe for marine, reef and hard water freshwater aquariums such as African cichlids. South Seas Base Rock can also be an interesting and realistic addition to a desert reptile biome. 40 lb. box #00370 | 500 lb. pallet #00373 | 1000 lb. pallet #00374 | 10 lb. Net bag 00372

**Instant Aquarium™** - line offers a variety of finer grade natural gravels and sands water packed with living, water-purifying bacteria, state of the art clarifier, and a complete water conditioner. Tap water is all you need to get started. Instant Aquarium™ immediately begins the cycling process, eliminating new tank syndrome, and discouraging nuisance algae. Instant Aquarium™ detoxifies metals, eliminates ammonia, neutralizes chlorine and chloramines, and provides a protective slime coat for stressed fish. Instant Aquarium™ also reduces nitrates and nitrites. Starting a new aquarium has never been easier.

**Eco-Complete™ Planted™** - Eco-Complete's "secret" lies in rich basaltic volcanic soil which contains iron, calcium, magnesium, potassium, sulfur plus over 25 other elements to nourish your aquatic plants. Now contains Floraspore™. These symbionts activate the root-substrate interface to facilitate the uptake of minerals which make for a healthier root and healthier plant. Iron rich Eco-Complete™ eliminates the need for laterite. No artificial dyes, paints, or chemical coatings. Eco-Complete™ has highly porous spherical grains for optimum diffusion performance and contains live heterotrophic bacteria to rapidly convert fish waste into natural food for your aquatic plants. It establishes a natural biological balance which makes cycling a new aquarium faster and safer.

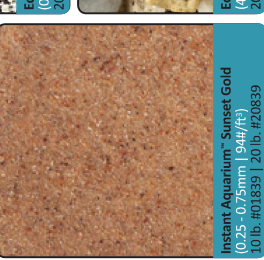

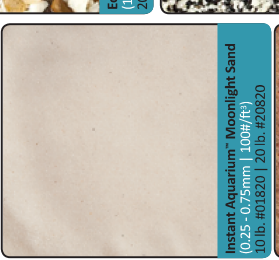

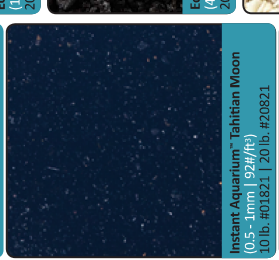

Eco-Complete™ Planted Black (3.0 - 6mm | 54#/ft<sup>3</sup>)  
20 lb. #A00770

Eco-Complete™ Planted Black, Fine (0.25 - 0.5mm | 54#/ft<sup>3</sup>)  
20 lb. #A00775

Eco-Complete™ Planted Red (3.0 - 6mm | 54#/ft<sup>3</sup>)  
20 lb. #A00771

**Instant Aquarium™ Crystal River** (0.5 - 1mm | 95#/ft<sup>3</sup>)  
10 lb. #A01840 | 20 lb. #20840

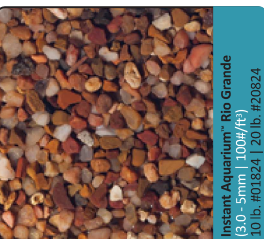

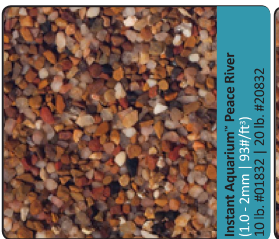

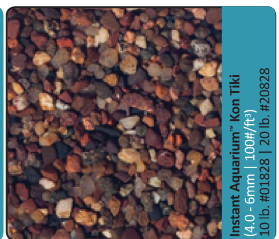

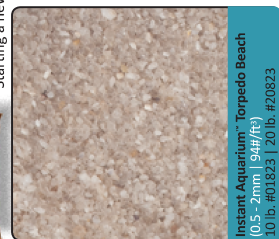

Instant Aquarium™ Crystal River (0.5 - 1mm | 95#/ft<sup>3</sup>)  
10 lb. #A01840 | 20 lb. #20840

Instant Aquarium™ Tahitian Moon (0.5 - 1mm | 92#/ft<sup>3</sup>)  
10 lb. #A01821 | 20 lb. #20821

Instant Aquarium™ Moonlight Sand (0.25 - 0.5mm | 100#/ft<sup>3</sup>)  
10 lb. #A01820 | 20 lb. #20820

Instant Aquarium™ Sunset Gold (0.25 - 0.5mm | 94#/ft<sup>3</sup>)  
10 lb. #A01839 | 20 lb. #20839

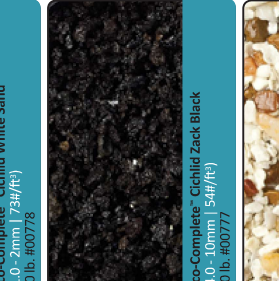

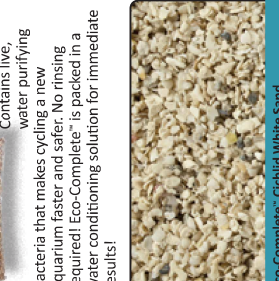

Instant Aquarium™ Torpedo Beach (0.5 - 2mm | 94#/ft<sup>3</sup>)  
10 lb. #A01823 | 20 lb. #20823

Instant Aquarium™ Kon Tiki (4.0 - 6mm | 100#/ft<sup>3</sup>)  
10 lb. #A01828 | 20 lb. #20828

Instant Aquarium™ Peace River (1.0 - 2mm | 93#/ft<sup>3</sup>)  
10 lb. #A01832 | 20 lb. #20832

Instant Aquarium™ Rio Grande (3.0 - 5mm | 100#/ft<sup>3</sup>)  
10 lb. #A01824 | 20 lb. #20824

**Eco-Complete™ Cichlid** - Maintains the high pH that African Cichlids need while helping to resist pH drops associated with Cichlid systems. It buffers automatically for the life of the aquarium. Contains live water purifying bacteria that makes cycling a new aquarium faster and safer. No rinsing required! Eco-Complete™ is packed in a water conditioning solution for immediate results!

Eco-Complete™ Cichlid White Sand (1.0 - 2mm | 73#/ft<sup>3</sup>)  
20 lb. #A00778

Eco-Complete™ Cichlid Zack Black (4.0 - 10mm | 54#/ft<sup>3</sup>)  
20 lb. #A00777

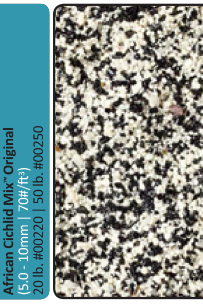

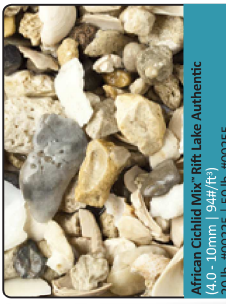

Eco-Complete™ Cichlid Ivory Coast (1.0 - 2.5mm | 80#/ft<sup>3</sup>)  
20 lb. #A00774

Eco-Complete™ Cichlid Sand (0.5 - 1.5mm | 92#/ft<sup>3</sup>)  
20 lb. #A00772

Eco-Complete™ Cichlid Gravel (4.0 - 10mm | 72#/ft<sup>3</sup>)  
20 lb. #A00773

**African Cichlid Mix™** - Offered in seven varieties to suit every aquarist's taste. CaribSea's African Cichlid substrates can help recreate a variety of environments. Rift Lake Authentic™ is a typical Mbuna setup while Sahara Sand™ is ideal for nesting featherfins. The African Cichlid Mix™ Original is great in just about any application! The bold colors of all the Cichlid Mixes encourage the vibrant, natural coloration of your fish. CaribSea's Cichlid products naturally buffer for the life of the aquarium simplifying the process of matching water quality parameters to the Great Rift Lakes of Africa. African Cichlid Mixes™ also resist the eventual downward drift of pH in long established or crowded systems. Seasoned hobbyists and beginners alike appreciate the ease of maintaining water quality as much as the beauty of these substrates.

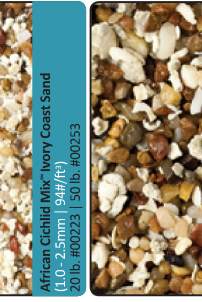

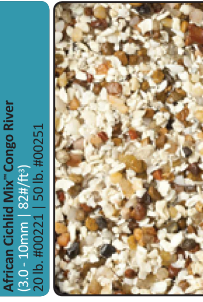

African Cichlid Mix™ Rift Lake Authentic (4.0 - 10mm | 70#/ft<sup>3</sup>)  
20 lb. #A00225 | 50 lb. #A00255

African Cichlid Mix™ Original (3.0 - 10mm | 70#/ft<sup>3</sup>)  
20 lb. #A00220 | 50 lb. #A00250

African Cichlid Mix™ Sahara Sand (0.5 - 1.5mm | 92#/ft<sup>3</sup>)  
20 lb. #A00222 | 50 lb. #A00252

African Cichlid Mix™ White (1.0 - 2mm | 73#/ft<sup>3</sup>)  
20 lb. #A00226 | 50 lb. #A00256

African Cichlid Mix™ Congo River (3.0 - 10mm | 82#/ft<sup>3</sup>)  
20 lb. #A00221 | 50 lb. #A00251

African Cichlid Mix™ Ivory Coast Sand (1.0 - 2.5mm | 94#/ft<sup>3</sup>)  
20 lb. #A00223 | 50 lb. #A00253

African Cichlid Mix™ Ivory Coast Gravel (3.0 - 5mm | 94#/ft<sup>3</sup>)  
20 lb. #A00224 | 50 lb. #A00254

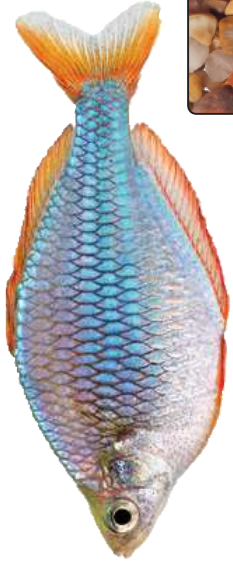

**FloraMax™** - Reduce the need for laterite type supplements in planted aquaria. The bold look of FloraMax™ helps bring out the color of your aquarium fish, and makes your plants stand out as well. CaribSea substrates that not only perform, but also look beautiful.

FloraMax™ Volcano Red (3.0 - 6mm | 54#/ft<sup>3</sup>)  
12 lb. #A00880 | 32 lb. #A00881

FloraMax™ Midnight (3.0 - 6mm | 54#/ft<sup>3</sup>)  
12 lb. #A00880 | 32 lb. #A00881

FloraMax™ Original (2.0 - 5.5mm | 68#/ft<sup>3</sup>)  
15 lb. #A00830 | 40 lb. #A00860

**Super Naturals™** - Create a super natural experience by re-creating the natural world in your home. Enjoy a piece of the Rio Negro as it winds its way through dark and brooding jungles. Own a sliver of the sunlit Sri Lankan gravel streams famous for sapphires and rubies. Dramatic black sand rivers and beaches grace the flanks of verdant tropical islands capped by smoldering volcanoes. These exotic locales provide the backdrop for some of the world's most spectacular aquatic life. CaribSea's Super Naturals™ line is specially selected and crafted to match these exotic environments. When you demand authenticity don't just decorate... escape with Super Naturals™ by CaribSea.

**Super Naturals™ Rock Stars** - Carrying a full line of freshwater rocks has never been easier with new Super Naturals™ Rocks Stars from CaribSea. All your favorites like Salt and Pepper Granite and Red Lava, and a few soon to be favorites too like Kahuna Black Lava, and Alien Eggs that glow in the dark! There are nine choices in all. So stop struggling with scales at the counter, and cherry picked boxes in the back room. Simply scan the UPC on the back, and send your customer home with the quality and selection you expect from CaribSea. We make it easy to rock on.... For those who like classic rock (or to rock it "old school"), we do offer 25 lb. bulk boxes too.

**Texas Holey Rock** - Howdy partner! In order to bring you the holiest rocks we could find, our posse from CaribSea went hunting down in Texas. This rock is so holey you would think we emptied both of our six-guns into each piece. We often have show pieces available (18 inches and larger), they are a limited availability item; please call for current inventory.  
40 lb. box #00320 | Show Size 18 inch+ #01380/pound

**PurpleUp™** - uses a unique dual method approach to coralline algae acceleration. This approach is so unique that PurpleUp has been awarded a US patent (US patent No. 7,565,883). It contains ionic calcium; which immediately raises dissolved calcium levels in your aquarium water. At the same time Super Sea Calcium™ (a 10 micron aragonite powder derived from natural seawater) targets the live rock surface. This dissolves in situ; delivering calcium, strontium, magnesium, and carbonate right where it's needed. PurpleUp™ also replenishes iodine; an essential element for coralline algae tissues that quickly becomes depleted in closed systems. PurpleUp™ is not a fertilizer; it does not promote the growth of nuisance algae. 4 oz. #04530 | 8 oz. #08530 | 16 oz. #00530 | 1 gal. #01530

Marine

**AmmoBuster™ Extreme** - The one step water conditioner that does it all! It will not only eliminate ammonia, chlorine and chloramine, but detoxify heavy metals, even copper. At the same time, AmmoBuster™ Extreme will replace a fishes protective "slime coat", add essential electrolytes, boost alkalinity, and reduce fish stress. It even neutralizes nitrite! Ideal for handling high ammonia levels in newer aquariums where the waste reducing bacteria populations are not yet adequate. 8 oz. #08535 | 16 oz. #00535 | 1 gal. #01535

Freshwater/Marine

**AquaBioTic™ Botanical** - This advanced freshwater aquarium product contains liquid barley straw extract, beneficial waste reducing bacteria and enzymes for a total eco-systemic approach to aquarium maintenance including high water clarity. Use on a regular basis for excellent results with delicate freshwater aquatic life such as invertebrates, plants, and soft water fishes. 8 oz. #08537 | 16 oz. #00537 | 1 gal. #01537

Freshwater

**AragoMilk™** - This unique product provides two types of buffer in one: bicarbonate for immediate response, plus carbonate from aragonite. This second form makes a safer, time-release buffer, over 2-3 days, for long term security without the wild pH swings that can stress your tank inhabitants. You'll notice it will stop downward pH swings so common in large fish only marine and Cichlid set ups. Great for your livebearer aquariums too. 4 oz. #04521 | 8 oz. #08521 | 16 oz. #00521 | 1 gal. #01521

Freshwater/Marine

**BufferPlus™** - Has the stable buffering always associated with aragonite buffers but also has double the alkalinity boosting power to get your alkalinity where you need it when you need it. BufferPlus™ also makes it ideal to use with ionically imbalanced supplements such as those that contain calcium chloride. BufferPlus™ also contains calcium and trace elements such as strontium, and magnesium for robust and vibrant corals, and invertebrates. 6 oz. #06522 | 16 oz. #00522

Freshwater/Marine

**PhosBuster™ Pro** - has a unique patent pending formula that removes dissolved phosphates in minutes instead of days. Safe for all reef tanks, saltwater, and freshwater aquariums of all sorts. Each 8 oz. bottle removes at least 1.5 ppm in up to 250 gallons of water! No more fiddling with filter bags or special reactors; just dose it and forget about your phosphate problem. PhosBuster™ Pro may be used regularly as part of a preventative maintenance program. 4 oz. #04508 | 8 oz. #08508 | 16 oz. #00508 | 1 gal. #18508

Freshwater/Marine

**AquaBioTic™** - This product is an all natural formulation consisting of a suite of beneficial waste reducing bacteria strains (aerobic and anaerobic) designed to reduce the need for water changes and gravel cleaning duties in fresh or saltwater aquariums. With regular use, AquaBioTic™ minimizes toxic ammonia, nitrite and nitrate waste as well as noxious odors by eliminating excess food and fish waste. Its aquarium maintenance in a bottle! 8 oz. #08536 | 16 oz. #00536 | 1 gal. #01536

Freshwater/Marine

**AragoMight™** - Ideal for African Cichlids, livebearers, and any marine aquarium. Pure aragonite, ground to 10 microns for maximum surface area, provides flash mineralization of purified water. This non-caustic powder supplies calcium and carbonate, as well as a full suite of natural trace elements, all without any ionic residual or by-product of any kind. How? Aragonite is what your corals are made of, nothing more and nothing less. 12 oz. #12520 | 16 oz. #00520 | 50 lb. #00550

Freshwater/Marine

**BioMagnet™** - Cloudy water is caused by fine suspended particles. BioMagnet™ imparts a positive electrical charge and quickly seeks out and encapsulates the suspended particles, enabling the positively charged particles to be drawn to the filter. Particles caught in the filter are broken down by bacteria, and suspended bacteria are now repositioned onto strata where they are most efficient. The result? Crystal clear water, fast, and a better biological filter! 8 oz. #08524 | 16 oz. #00524 | 1 gal. #01524

Freshwater/Marine

**D-Chlor-It™** - is your one step water conditioner that does all you need to turn ordinary tap water into aquarium safe water. D-Chlor-It™ not only neutralizes chlorine and chloramines, but also ammonia, heavy metals, even copper. At the same time, D-Chlor-It™ replaces the skin "slime coat", adds essential electrolytes, boosts alkalinity, and reduces fish stress. D-Chlor-It™ even detoxifies nitrite. 8 oz. #08534 | 16 oz. #00534 | 1 gal. #01534

Freshwater/Marine

**ReefCal™** - is a 100,000 ppm ionic calcium solution. ReefCal™ will raise calcium levels by just over 5 ppm per capful (5ml) per 25 gallons of water. Use a good quality test kit to monitor dissolved calcium levels in the aquarium. ReefCal™ should be used with a buffer like BufferPlus™. 8 oz. #08533 | 16 oz. #00533 | 1 gal. #01533

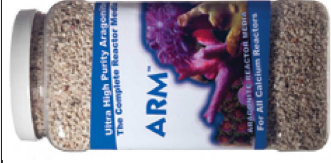

Marine

**ARM™ Extra Coarse** - A high magnesium reactor media. ARM™ Extra Coarse is still a complete reactor media containing not only calcium and carbonate, but essential trace elements as well. (70#/ft³)  
ARM™ Extra Coarse contains:  
275200 ppm Calcium  
590000 ppm Carbonate  
2200 ppm Strontium  
2000 ppm Magnesium  
1 gal. #00529 - 2/cs  
50 lb. #00559 - 1/ea

**ARM™ Coarse** - Calcium reactors have evolved into different media sizes. Because of this we now offer ARM™ Coarse that have become so popular. This coarse grade of ARM™ will prevent the clogging and upkeep associated with fine media and these reactors. (70#/ft³)  
Contains:  
381,000 ppm Calcium  
590,000 ppm Carbonate  
2200 ppm Strontium  
2000 ppm Magnesium  
1 gal. #00531 - 2/cs  
50 lb. #00551 - 1/ea

**ARM™ Fine** - ARM™ Fine has the highest solubility of any reactor media available (metastable at 8.2) so typical CO<sub>2</sub> consumption is much lower. (65#/ft³)  
Contains:  
381,000 ppm Calcium  
590,000 ppm Carbonate  
7300 ppm Strontium  
1050 ppm Magnesium  
1 gal. #00525 - 2/cs  
50 lb. #00555 - 1/ea

**Mineral Mud™** - A unique blend of sediments that duplicate tropical fringing coastal mangrove environments. Its particles are in a size range compatible with soft, burrowing infaunal, macrofaunal, and meiofaunal animal assemblages. Ideal for mud refugiums, seagrasses, macro-algae, and mangroves. Mineral Mud™ provides a variety of trace elements plus calcium, strontium, iron, sulfur and free carbon. In addition, Mineral Mud™ contains live marine bacteria to complete the tropical ecosystem. (82#/ft³)  
1 gal. #00526 - 2/cs  
50 lb. #00556 - 1/ea

**LSM™** - Pure granular elemental sulfur, with sulfur reducing bacteria right on it for faster break in. This is the same product utilized by public aquariums for effective nitrate reduction in high bioload fish only systems. This method of nitrate reduction lowers nitrate and provides additional pH support. Booster bacteria pack included. (67#/ft³)  
1 gal. #00528 - 2/cs | 50 lb. #00558 - 1/ea

**NO-NO™** - Nitrate troubles? Sulfur denitrification is a tried and true method that has been used for years in commercial water treatment. These biologically driven denitrator/reactors rely on a combination of pure sulfur, aragonite and sulfur reducing bacteria. NO-NO™ is a ready to use blend of sulfur and aragonite for simple sulfur denitrification. Booster bacteria pack included. (68#/ft³)  
1 gal. #00527 - 2/cs | 50 lb. #00557 - 1/ea

**Sea-Pure™** - is real seawater and contains all the major and minor trace elements found in natural seawater in correct proportions and at the proper pH. No potentially harmful pathogens. No nitrates or phosphates, no harmful organics, no artificial preservatives or chemicals. Stop wondering if your salt mix lives up to real seawater, or the harmful impurities in your tap water. Sea-Pure™ is simply seawater as nature intended. Booster bacteria pack included. 2.5 gal. #00622 - 2/cs | 14.4 gal. #00644 - 1/cs

**Ready Water™** - Start your aquarium on the right foot and be certain that you are making your planted aquarium water changes with the best quality water possible. Ready Water™ is purified de-ionized water with added minerals in precise proportions plus added wide spectrum water conditioning capacity. It's an aquarium tune up every time you use it! Booster bacteria pack included. 2.3 gal. #00922 | 4.4 gal. #00944

**The A.R.K.™** - Aragonite Refugium Kit - Micro florae, micro faunas, micro fungi, and other beneficial organisms such as copepods and decapods. The larger macro-pores created by the variety of calcium carbonate rubble form a cryptic zone to encourage the growth of water purifying sponges and larger invertebrates such as shrimp, worms, and serpent stars. Also inside, a 5 lb. bag of CaribSea's Mineral Mud™ to be used around Caulerpa, Halimeda, and other macro-algae plantings or anchors. The A.R.K.™ also contains a 4 ounce bottle of Purple Up™, the only patented coralline algae accelerator, and an 8 ounce bottle of Aquabiotic™ to aid in the start up of necessary water purifying bacteria. You will also find an 80 gallon dose of Bio-Magnet™, which clarifies water and places bacteria within the substrate and filter media as needed. CONTENTS: (fill in 5 gallon bucket) 40 lbs of Arag-Alive! Bahamas Oolite aragonite sand, 1-1.0 mm.; 10 lb. of natural calcium carbonate rubble 25+mm; 5 lb. of Mineral Mud™; 1- 8 ounce Aquabiotic™; 1- 4 ounce Purple-Up™; 2- 40 lb. dose packs of Bio-Magnet™. 5 gallon bucket #00560

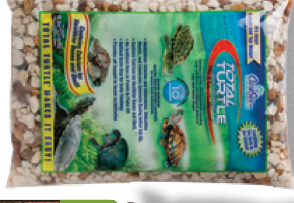

**Desert Bone™** - Rock is an all natural alternative to plastic reptile enclosure decorations. Made of pure calcium carbonate, Desert Bone™ Rock offers a more textured surface than plastic, and can aid in shedding by giving the reptile something to rub on just like in the wild. Each Desert Bone™ Rock is unique, and its natural holes and crevasses give reptiles a variety of hiding places. Desert Bone™ Rock will also gently absorb heat from sunlight or artificial lamps, and slowly release this heat over time just like in the desert. Your reptiles can find familiar, comfortable refuge in this unique, natural rock.

Small #00314  
Large #00314

**Total Turtle™** - Finally, the perfect substrate for aquatic turtle care! Your choice of our Coarse grain size for under gravel filters, or our Fine grade for external filtration (great for mud dwellers too!), both complete with beneficial calcium. Total Turtle™ provides pH support to prevent water from becoming too acidic, and has superior enhanced surface area for supporting water purifying bacteria. Total Turtle™ will give you a healthier, happier turtle!

Total Turtle™ Coarse  
10 lb. #01584

Total Turtle™ Fine  
10 lb. #01584

**Coco Soft™** is your best bedding value. Coco Soft™ smells fresh up to 3 times longer than other reptile bedding by eliminating odors naturally, not simply masking them with perfumes or aromatic oils. Coco Soft™ becomes a living substrate that functions like a forest floor ecosystem with up to 20 times the biological activity of other brands. Coco Soft™ begins with fresh 100% organically grown coconut husk, never fermented in saline water. In fact Coco Soft™ has been demonstrated in a major university study to reduce the growth of pathogenic fungi by up to 77%! These same microorganisms quickly reduce organic waste, keeping the enclosure cleaner and smelling fresh, even on a heavy feeding schedule. A cleaner cage means a healthier pet.

**Perfect for:**  
Insects (Crickets too!), Arachnids, Dart Frogs, Amphibians, Small Reptiles

Coco Soft™ Fiber  
4 qt. #04210 | 10 qt. #00210 | 24 qt. #24210

**Perfect for:**  
Archeanal Snakes, Large Atractinids, Large Insects, Small to Medium Snakes, Small to Medium Lizards, Great for Hides!

**Perfect for:**  
Tortises, Medium to Large Snakes, Medium to Large Lizards

Coco Soft™ Fine Chip  
4 qt. #04212  
10 qt. #00212 | 24 qt. #24212

Coco Soft™ Coarse Chip  
4 qt. #04211  
10 qt. #00211 | 24 qt. #24211

**Voodoo Wood™** - is collected deep in the bayous of Louisiana. It is especially ideal for reptiles and amphibians as it lacks the salt contamination of coastal collected driftwood and is easy on sensitive skin. Each piece of Voodoo Wood™ is unique. The long, slender shapes help to give height to your ecosystem and offer your reptile and amphibian friends a more realistic environment so they feel secure and safe. Voodoo Wood™ will absorb water naturally to help maintain humidity.

Small #00301  
Large #00302  
Jumbo #00303

**Full Moon™** glow in the dark sand for reptiles will give you the night life you've been looking for! Full Moon glows in the dark, giving a unique look to desert reptile enclosures once the lights are out. This low impact, fine grade sand is ideal for bearded dragons, adult leopard geckos, uromastix, and other desert reptiles. Fun for scorpions and other arachnids too. It's especially cool when combined with Moonlite Glu-Rocks, real fossil rocks that glow. Light up the night!

5 lb. #05800

**Moonlite Glu-Rocks™** make things fun day or night, these rocks look completely natural in daylight, but in darkness (after being charged) or under black light they glow an eerie green!

2.5 lb. Net bag #00308  
5 lb. Net bag #00307

**Coco Fresh™** the new science of litter. CarbsSea is the leader in probiotic substrates, and we are thrilled to introduce Coco Fresh™. Coco Fresh™ uses natural microbiology for unsurpassed odor control. Coco Fresh™ is different. There is not just a small difference, its not just better, than what is already out there, it's amazingly better. Coco Fresh™ naturally eliminates odor, it doesn't just cover it with smelly perfumes. Plus, this product is truly green. It is completely biodegradable, organically processed, and does not harm any trees in its production. Coco Fresh™ doesn't have any timber or even timber by-products, no resins, nothing artificial. Seeing, or rather smelling, is believing. Use it once, and you'll become a Coco Fresh™ believer too.

Coco Fresh™  
4 qt. #00004 | 10 qt. #00010 | 60 qt. #00060

**Crabibat™** is sand for land-dwelling hermit crabs. Available in 9 fun colors including pink, green, yellow, and even glow-in-the-dark. Crabibat™ contains real ocean sand, rich in calcium, just what hermit crabs need and love. So no need to be crabby, Crabibat™ is just perfect!

## About our Brands

### My Earth Pet

In 2008, My Earth Pet was launched after developing one of the most amazing small animal litters in the history of the industry, and no... We are not exaggerating!

Blue Iguana Brand Launched in 2004, Blue Iguana Brand products have rapidly become a trusted name in the world of herpetology. With truly unique and highly effective products, Blue Iguana Brand is setting new standards in the industry. We support the RCF (www.RCF.org) to help save endangered reptiles all over the world.

**Reptilite**  
CALCIUM SUBSTRATE

**Reptilite** - An all natural calcium substrate. Ideal for true chameleons or any tortoise, snake, lizard, arachnid, or insect that comes from an arid or semi arid environment. The naturally spherical grains won't scratch your valuable animals inside or out! This low impact substrate also contains strontium and magnesium while being free of silica and phosphates. Though not intended as a food source or supplement, it is 100% edible and easily digestible. In fact, Reptilite™ is made of aragonite, the most soluble form of calcium carbonate available. Trusted by professional reptile breeders and hobbyists alike.

**Reptilite - Brics** - have all of the great benefits of our original Reptilite™, in new jaw drooping colors.
