FREQUENTLY ASKED QUESTIONS

DO SP PRICES INCLUDE VAT?

SP prices do not include VAT. If you are an individual or an organisation that is required to pay VAT do not forget to add this amount to your order at the current rate. Please do not add VAT to the cost of any books ordered as these are currently zero rated*. The rate of VAT is currently 20%.

*Information is correct as of 01/01/2016 but is subject to any changes made by the UK government.

CAN I OPEN A CREDIT ACCOUNT?

SP will open accounts for established UK businesses and organisations, subject to receipt of a satisfactory credit rating. Unfortunately we cannot offer credit accounts to individuals. Credit account application form on page 353

WHEN WILL I RECEIVE MY ORDER?

SP will usually aim to despatch any UK orders that are made before 3.00pm and held in stock on that same day. Your receipt of the order will usually be within 2-3 working days. UK overnight delivery is also available at a small additional cost.

CAN I ORDER ON THE INTERNET?

SP has an online brochure at www.spservices.co.uk Credit card orders can be placed online using our secure shopping cart facility. Account customers can also use our online ordering facility.

HOW WILL MY ORDER BE DELIVERED?

SP prides itself on its quality of service, orders are despatched quickly and efficiently in robust packaging. SP only use the most reliable delivery despatch services available, utilising signed proof of delivery and computerised tracking on every parcel.

CAN I ORDER IN PERSON?

Yes! We have a fully stocked showroom at our Bastion House HQ in Telford. You're welcome to visit during normal opening hours.

Leasing Capital Equipment with SP Services

Purchasing high value items such as Defibrillators, ECG Monitors, Furniture and SPO2 Monitors can put a big hole in anyone's finances. Thankfully, we can make it easier.

As long as the equipment you require is over £1000, you can have the cost broken down into small, manageable chunks which will be collected from you via a monthly direct debit*. Once it's set up you don't have to worry about it again. We're hoping that this scheme will help you, our customers, make your money go further!

Benefits for you

- Flexible payment schemes to suit your business requirements
- No major upfront costs
- Spread the cost over 3 or 5 years
- Improved productivity through the purchase of the latest equipment
- Quick response times enabling you to have the equipment ASAP
- Fixed and regular payments collected by Direct Debit
- Existing credit such as bank loans and overdrafts are not affected
- Leasing payments are 100% tax deductible against company profits

Call our customer services line on 01952 288 999 or visit our website for more information

Relipad Xtreme Dressings

The Relipad Xtreme dressing has a wound contact layer on both sides, allowing for correct application in low light conditions. The hexagonal design of the wound contact layer helps prevent strike through to the back of the dressing.

- Advanced wound contact layer
- Low-adherence technology
- Hi-tech hexagonal mesh
- Fluid flows in one direction only
- Absorbs up to 10 times its own weight
- Retains fibre integrity when cut
- For use on lacerations, minor burns, grazes and as a post-operative dressing

CODE	ITEM
DR/381	Relipad Xtreme Dressing - 5 x 5cm - Box of 50
DR/382	Relipad Xtreme Dressing - 10 x 10cm - Box of 50

Relipore Xtreme Dressings

The Relipore Xtreme dressing has a wound contact layer on one side - and on the other - a flexible, breathable adherent, stretch fabric that conforms to the body, is easy to remove, but remains securely in place once applied.

- Advanced wound contact layer
- Low-adherence technology
- Hi-tech hexagonal mesh
- Fluid flows in one direction only
- Absorbs up to 10 times its own weight
- Retains fibre integrity when cut
- For use on lacerations, minor burns, grazes and as a post-operative dressing

TyTek Trauma Bandage

- Sterile, non-stick pad suitable for applying immediate pressure to wounds
- Easy-open white tear notches for easy ID and quick access
- Intermittent velcro prevents trauma bandage from unrolling during application
- Integrated clips at the end of the bandage to easily secure the pressure dressing to the patient
- Eliminating the need for separate gauze pads and elastic wraps
- Simple, quick, controlled and effective pressure dressing system
- Vacuum sealed to minimize cubic space

CODE	ITEM
DR/816	TyTek Trauma Bandage 15 x 178cm Pad

T4 & T6 Trauma Wound Dressing Pad

SP's T4 and T6 trauma wound dressings are designed to treat every possible bleeding wound. The dressings are sterile, non-adherent and are easily wrapped and secured.

- Trauma dressing with heavy duty bandage
- Available in two sizes (T4 and T6), the T Series trauma dressings have been designed for use in extreme conditions
- Double bagged packaging for extra protection
- Inner bag is vacuum packed to reduce storage space
- Provides immediate direct pressure to the wound
- Quick and easy to use
- Absorbent high quality dressing pad
- Secure fastening, no need for safety pins or tape
- Single use
- Sterile
- Supplied in an easy to open waterproof poly bag

CODE	ITEM
DR/824	T4 Trauma Dressing 10 x 18cm, pad with a 10cm x 2m elasticated bandage
DR/826	T6 Trauma Dressing 15 x 18cm, pad with a 15cm x 2m elasticated bandage

TraumaFix Military Dressing

- TraumaFix is a substantial, highly absorbent dressing pad, capable of absorbing over ten times its own weight in fluid
- A pressure bandage allows direct pressure to be applied quickly and maintained easily, this is secured instantly with a velcro style fastening
- Multiple major bleed injuries can be stemmed quickly, allowing the casualty to be moved easily
- The dressing is a significant advance in the treatment of trauma injuries
- Highly absorbent non-adherent wound pad
- High pressure bandage
- Super-fast application, quick-fix velcro style fastening
- Sterile

CODE	ITEM

DR/900	TraumaFix Military Dressing - 20 x 19cm Pad

Olaes Modular Bandage Trauma Dressing

- The newest generation of Olaes modular trauma bandage
- Features 3m of wound packing gauze and a removable occlusive plastic sheet behind the dressing pad
- Velcro control strips provide security throughout the application process and prevent accidental unravelling
- Has a unique pressure cap that generates true pressure when on top of required wound site
- Pressure cap can also be used as an eye cup for treatment of ocular injuries

Blast Bandage

- The Blast Bandage was designed to provide the ability to quickly package traumatic amputations, burns and large pattern wounds with minimal use of supplies and minimal effort
- Provides a 50 x 50cm treatment area but packs to the size of a 10cm combat bandage
- Large non-adherent wound pad can be easily wrapped around limbs and secured with the attached elastic wrap
- Large enough to cover the entire back or chest of most casualties
- A removable occlusive layer will cover a 48 x 48cm area or can be used to cover abdominal contents minimizing the loss of heat and moisture
- The 'brakes' are especially helpful during the dressing of amputations, providing multiple points of adhesion preventing slippage of the elastic during the rapping process

Israeli Military Abdominal Large Area Wound Dressing

- Stop & Go release - providing controlled application of the bandage without the risk of unravelling
- Handle Loop - a fold at the end of the Wrapping Leader that maintains placement and aids proper positioning on the wound
- For self-application, the Handle Loop facilitates correct bandaging
- The bandage is double vacuum packed to ensure its integrity and sterility while tear notches opposite each other on the outer packaging enable easy opening
- Dimensions - 30 x 30cm non-adherent sterile pad connected to 25cm x 4.5m elasticised Wrapping Leader

First Care Civilian Sterile Dressing

- Highly absorbent dressing pad 10 x 17.5cm
- Pressure applying bar
- Retaining bandage
- Securing clip
- Provides immediate direct pressure to the wound
- Quick and easy for personal or professional application
- Trauma dressing with heavy duty compression bandage

<C> ABC Trauma & Gunshot Wound First Aid Pack

- Survivability of trauma wounds has undergone an unprecedented revolution. People are surviving catastrophic injuries which, only a few years back, would have been fatal.
- <C> ABC is the military's highly-successful "catastrophic haemorrhage first" updating of the traditional ABC of Airway, Breathing, Circulation first aid treatment priorities.
- Unique 'Use or Discard' implementation of <C> ABC - where every item acts as a step-by-step aide memoire
- Compartmentalized Task Focus - avoids distractions from the immediate task
- Wearable 'there when you need it' design - because time is everything in trauma injury and big kits get left in the car
- Specific to Time-Critical : Life-Threatening situations - you don't want to be distracted with sticking plasters or non-essential items when dealing with Trauma injury
- Key items are the same as UK/NATO military issue - so you can be confident you have the best equipment and are compliant with de facto UK standards

Contents

- 1 x Combat Application Tourniquet - Orange
- 2 x Bolin Chest Seal

Chito-SAM 100 Haemostatic Dressing

- Chito-SAM 100 is a high performance 100% pure chitosan haemostatic dressing designed to stop lethal bleeding fast
- It is easy to use, extremely effective, and safe
- Works independently of the body's normal clotting processes
- The haemostatic performance is extremely effective compared to products impregnated or coated with chitosan haemostatic agents
- Achieves haemostasis 3x faster than competitors in in-vitro clotting tests
- Unlike most haemostatic dressings, Chito-SAM 100 is made of non-woven, 100% pure chitosan
- Independent tests have shown it to perform 25% better than a leading chitosan gauze
- With this increased efficacy, you can use less gauze to achieve the same haemostatic result
- In addition, our unique 'tear anywhere' packaging allows quick access to the product for fast application
- 'On the battlefield, haemorrhage from wounds remains the leading cause of mortality, accounting for 50% of all deaths. Haemorrhage is also the second leading cause of mortality among injured civilians, accounting for 39% of civilian trauma deaths.'

Chito-SAM™ 100
100% Chitosan Haemostatic Dressing

H&H PriMed Compressed Gauze

- H&H PriMed Gauze takes care of moderate to severe wounds involving heavy blood loss
- Made from high quality cotton for maximum absorption and stability
- Vacuum packed into a small package for easy storage, yet expands to cover large wound areas
- Often used with a compression bandage, this is the perfect tool to help slow severe blood loss and save lives
- Dimensions: 11.5cm x 3.75m

CODE	ITEM
DR/801	H&H PriMed Compressed Gauze

Stop bleeding... Save lives

Haemorrhage or bleeding remains a main cause of preventable death amongst trauma victims and responsible for 30 to 40% of all trauma deaths. Out of these deaths, up to half occur before even reaching hospital. To add to the problem, in the severe trauma cases, the blood no longer clots normally, due to the body cooling or the shock reaction to the injury.

Celox haemostats stop life threatening bleeding, using a unique chitosan formulation which does not depend on the body's clotting system and does not generate any heat.

Celox granules have been shown to work on the most challenging cases: hypothermic (cool) blood and blood containing anticoagulants such as heparin.

Celox is easily cleaned and removed when the patient reaches surgery and because there are no minerals, residual chitosan material can be metabolised.

How it works

Celox chitosan is made from refined shrimp shell. On contact with fluid, chitosan absorbs fluid, swells and forms an adhesive gel which sticks to tissue around the injury. Celox electrostatically attracts red blood cells to form a plug. Celox chitosan does not interact with the body's clotting mechanism and is equally effective if the body's clotting mechanism is not working due to trauma (hypothermia).

- Chitosan absorbs blood fluid, swells and forms a gel
- Celox™ forms a gel-like plug that stops the bleeding
- Does not rely on the body's own clotting mechanism
- No heat is generated

CELOX-A Haemostatic Applicator (6g)

- The CELOX-A Applicator is a specifically designed delivery system that gives you an easy, safe and effective way to stop life threatening bleeding from difficult to treat penetrating trauma
- The instinctive applicator allows you to get the CELOX granules through a small entry wound, directly to the bleeding site in just a few seconds
- The applicator is vacuum packed, sterile and lightweight and can be easily stored within your existing trauma pouch
- For penetrating wounds the CELOX-A Applicator does what CELOX does best - stops bleeding and saves lives

CELOX Training Gauze

- Made from exactly the same material as standard CELOX to ensure you get a truly realistic training experience
- CELOX Gauze has highly effective Celox granules bonded on to the surface of a stable gauze which will not compact under pressure
- Dimensions: 7.6cm x 5m
- Non Sterile

Foxseal Chest Seal

- Foxseal™ is a pioneering occlusive dressing for the treatment of open chest wounds as a tool in prevention of pneumothorax.
- Two seals per pack allow entry and exit wounds to be treated.
- Patient monitoring is vital in these injury types and the design is a simple valve-free option, for simple use. The chest can be vented with the easily-gripped tab and the adhesive re-seals.
- Treats injuries up to 15cm maximum length
- Provides dependable adhesion in the most challenging situations.

CODE	ITEM
IN/917	Foxseal Chest Seal

CELOX Rapid Gauze

- The latest haemostatic technology with unique Chito-R augmented chitosan giving faster emergency treatment in critical life threatening situations.
- Works with just 60 seconds
- Stops life threatening bleeding fast
- Reduces blood loss by 60%
- Stops hypothermic bleeding as found in severe traumatic injuries
- No minerals, chitosan is made up of glucosamine and N-acetyl glucosamine
- Celox™ Rapid is Nonallergenic and no heat is generated

CODE	ITEM

What size BS 8599-1 first aid kit do you need?

Employers are required to make a risk assessment to decide what the hazard levels are and how many employees are involved in the area to be covered. This is a useful guide to help match this risk assessment to an appropriate size or kit.

Category of Hazard	Number of Employees	Size of First Aid Kit
Low Hazard e.g. shops, offices, libraries etc.	Less than 25	Small Kit
	25-100	Medium Size Kit
	More than 100	1 Large Kit Per 100 Employees*
High Hazard e.g. light engineering and assembly work, food processing, warehousing, extensive work with dangerous machinery or sharp instruments, construction, chemical manufacture etc.	Less than 5	Small Kit
	5-25	Medium Size Kit
	More than 25	1 Large Kit Per 25 Employees

* depending on locality

BS 8599-2 Motorists First Aid Kits

- SP's new range of first aid kits designed specifically for motor vehicles
- Available in a robust hard plastic case, a soft bag or as a refill kit
- The small kit is ideal for vehicles with 1-2 passengers such as motorbikes, quad bikes etc
- The medium kit is designed for vehicles with 1-8 passengers such as cars, taxis etc
- The large kit is suitable for vehicles with 9-16 passengers
- Vehicles such as coaches and buses should consider having 2 or more of the Large kits, one at each end of the vehicle and on each level

The Morgan Lens Single Pack

- The Morgan lens delivers immediate continuous irrigation to injured eyes. In short, it saves sight. It also saves time, by freeing up your hands to attend other injuries
- A 'hands-free' method of irrigation
- It is widely used by physicians, nurses and other medical personnel for emergency eye irrigation
- In seconds, the eye can be receiving the lavage necessary to treat chemical and thermal burns or to remove non-embedded foreign materials in the eye
- The patient may then be comfortably transported while one or both eyes receive the most complete and comfortable ocular irrigation possible
- Saves time, saves trouble and saves eyes

BURNSHIELD®

BURNSHIELD, when applied to burn wounds, preferably as soon as possible after the burn, has the tremendous ability to absorb and dissipate heat, providing relief, minimising shock and skin damage, halting the burn process and physically protects against further contamination. BURNSHIELD's cooling and soothing effect results from its specially formulated Hydrogel which is non-toxic and non-irritant.

The active ingredient is Melaleuca alternifolia. The sterile dressing keeps the wound clean while

the loss of body fluids is kept to a minimum.

BURNSHIELD facilitates removal of burnt clothing. Easy to apply, non-adhesive and easy to remove without further trauma to the patient, allowing for quick medical diagnosis. Safe for use on children.

BURNSHIELD can be used as an emergency dressing for superficial to full thickness burns. Any burn, whether received from open flames, scalding from hot water, steam, gas, chemicals or electrical appliances can be treated immediately with BURNSHIELD®.

Burnshield Trauma Burn Dressings

- Sterile trauma burn dressing
- Simple to apply and remove without any discomfort
- Open cell foam dressings, individually packaged and easy to open
- Contains hydrogel, minimises trauma
- The packet for BU/092 can also be used as an emergency burn bag - used in conjunction with the dressing
- Simple to use - no special training required
- Provides instant cooling and pain relief
- Provides physical protection from inflammation
- Safe for use on children
- The dressing is non adherent and non toxic
- Ideal for pre-hospital burns care

Physicool Cooling Bandage

BA/322

- Physicool is currently being used within the NHS, private hospitals, private practices and by healthcare professionals to reduce pain, swelling and inflammation across a wide range of applications
- Manufactured using an open-cell weave which acts as the conduit for the Coolant and offers 2 to 3 hours of cooling before it will dry-out
- Due to the initial success achieved post-total knee arthroplasty (Garrett, 2012); Physicool is now being used to enhance patient rehabilitation post-operatively across all body parts, traumas and joints.
- Lasts for up to 2 hours
- Helps speed up healing
- No refrigeration necessary
- Can be re-used
- As seen on BBC's Dragons Den

SP Ice Pack Cold Compress

The SP Ice Pack gives essential fast and effective cold treatment for various tendon injuries, inflammation, knocks, sprains, strains, bruises and swellings.

This product has proved to be a great success and is especially popular with sports men and women, for the immediate treatment of sporting injuries such as sprains, strains, bumps and bruises. However, physiotherapy and first aid treatment for burns and scalds are other uses for which the SP Ice Pack has proved very successful.

Instant Ice Packs are multipurpose instant cold therapy packs with benefits to the Sports, Veterinary, Equine, Leisure, General Domestic and Industrial Markets.

The pack measures 300x135mm and does not require refrigeration. It does not cause freeze burns and can be applied directly to the body.

To activate the pack, simply squeeze the inner sachet until it bursts, then allow the chemicals to mix. Within seconds the contents react to produce an ice-like composition with a temperature of around freezing point.

The SP Ice Pack is currently being used by several county ambulance services, all areas of the Sports Industry, Veterinary, Equine and many other fields.

The pack can be disposed as household waste.

- Instant cold compress for sport injuries, physiotherapists & any emergency treatment
- Available for use instantly, no refrigeration required
- Simply squeeze pack to activate
- Produces an ice like composition with temperatures around freezing point
- Can be applied directly to the body
- Does not leave freeze burns on patient
- Used packs can be disposed of as household waste
- Measures 300 x 135mm

BioMask Anti Infection Face Masks

BioFriend's revolutionary, patented technology traps and kills bacteria and viruses on contact and allows you to breathe normally:

- Traps and kills 99.9% of harmful germs
- Superior breathability & comfort
- Self-sanitizing for all-day wear
- Reduces cross-contamination of hands and surfaces
- Kills germs including those that cause Influenza A, Swine Flu, Bird Flu, common colds, measles, MRSA, pneumonia and SARS.
- BioFriend traps microbes by mimicking the sites on human cells to which they normally attach, then, destroys them by disrupting their surfaces (viruses) or cell walls (bacteria).
- Visit www.spservices.co.uk/biomask for more details

- Rescue Original bags are supplied in either tough waterproof 1100 denier PAX-Dura or PAX-Plan materials
- Designed and developed by EMS professionals
- Some the most stylish, best constructed and desirable range of portable medical kits available

PAX-Dura fabrics are made of is an extremely robust polyamide fiber with a very high yarn density per square centimeter giving a the high tensile strength and abrasion resistance. PAX-Dura is also teflon impregnated to aid in dirt resistance.

PAX-Plan is very easy to clean. Manufactured from a polyester thread that has been PVC coated and lacquered, Pax-Plan bags offer excellent waterproof qualities and excellent cleaning and disinfecting conditions - essential where cross infection risks are present.

3M Littmann Classic III Stethoscope

- The Classic III Stethoscope brings new design, materials, and technology to the Littmann stethoscope series that's been used and trusted by medical professionals for decades. With a two-sided chest piece, dual tuneable diaphragms, improved tubing, and much more, the Classic III stethoscope combines the best of new and traditional.
- High acoustic sensitivity when performing general physical assessment
- Tunable diaphragms on both the adult and paediatric sides of the chestpiece
- Single-piece diaphragm that's easy to attach and easy to clean because the surface is smooth and without crevices
- Open bell versatility allows the paediatric side to convert to a traditional open bell by replacing the single-piece diaphragm with a non-chill sleeve
- Next-generation tubing with improved resistance to skin oils and alcohol for longer tubing life - less likely to pick up stains
- Chestpiece is precision-machined into an aesthetically pleasing, less angular shape, the stem features an open side indicator
- Classic III stethoscope includes a 5 year warranty

3M Littmann 3100 Electronic Stethoscope

- State-of-the-art sound sensor provides a life-like high-end cardiology stethoscope sound experience
- Ambient Noise Reduction technology reduces, on average, 85% of ambient background noise
- Frictional noise reduction technology helps you focus more on what you need to hear
- 24X sound amplification compared to the best mechanical Littmann stethoscope
- Looks, feels and weighs like a traditional Littmann stethoscope; can be draped over the neck or folded into a pocket
- LCD user interface with easy to operate controls, battery level indicator and heart rate monitor
- Worry-free power system, operates on a single AA battery with a tool-free battery compartment, with multiple reminders when battery life is low
- Auto-on feature; once on the unit stays in battery-saving 'sleep mode' until you start your next auscultation
- 15mm diameter sound sensor means that you can auscultate patients of all sizes, including children and adults.
- The solid metal chestpiece and rugged design offers years of trouble-free operation
- 2 year warranty
- 68cm (26in)

CODE	ITEM
3M/3100BK	3M Littmann 3100 Electronic Stethoscope - Black
3M/3100NB	3M Littmann 3100 Electronic Stethoscope - Navy Blue

3M Littmann 3200 Electronic Stethoscope

- Records and stores 12 separate sound tracks for use on multiple patients and positions
- This stethoscope reduces background noise by 85% while still allowing you to hear the critical body sounds you need to hear
- Snap Tight Soft-Sealing Eartips provide a comfortable fit and a tighter seal from ambient noise entering through eartip connections
- State-of-the-art sound sensor provides a life-like 3M Littmann sound experience similar to a high-end cardiology stethoscope
- Frictional noise reduction technology helps reduce handling noises compared to earlier stethoscopes
- Up to 24X sound amplification; may be helpful when a heart, lung or body sound is especially faint; when a patient is obese; or when a patient's clothing restricts your listening experience.
- Record heart sounds and transmit them to your PC for real-time analysis
- Easy to operate - the menu button brings you to screen-guided commands to operate recording and Bluetooth features
- Includes Zargis software and Bluetooth dongle
- Lightweight and comfortable to use - is about the same weight as a cardiology-grade acoustic stethoscope
- 2 years warranty
- 69cm (27in)

S3 Stat Stethoscope Tape Securing Device

Up until now, the easiest way to keep a roll of medical tape handy was to have it dangling on the earpiece of your stethoscope. As a professional in the medical field you have enough to keep you busy without having to worry about manually pushing the roll of tape down every time you want to use your stethoscope.

- Keeps a roll of 2.5cm medical tape secured to the bottom portion of the stethoscope earpiece
- Allows tape to turn easily for rapid tape removal Keeps tape easily accessible

Dirui H10 Reagent Urine Analysis Strips

- Simple to use, urine diagnostic reagent strips
- Tests for 10 parameters
- Strips are not air activated therefore last full shelf life
- Suitable for use by medical professionals and for users at home
- Provide early indications of developing health problems and identify potential abnormal functions requiring more extensive testing
- Routine use is frequently recommended for monitoring certain existing and chronic health conditions
- The reagent pads react with the sample urine to provide a visible color reaction within 30 seconds to one minute depending on the specific panel screen
- Tests for URS-K (Ketones) URS-3 (Glucose, Protein, pH) and URS-10 (Glucose, Protein pH, Leukocytes, Nitrites, Ketones, Bilirubin, Blood, Urobilinogen, and Specific Gravity)
- 10 Parameter - Pack of 100

CODE	ITEM

TRUEresult Twist Blood Glucose Meter

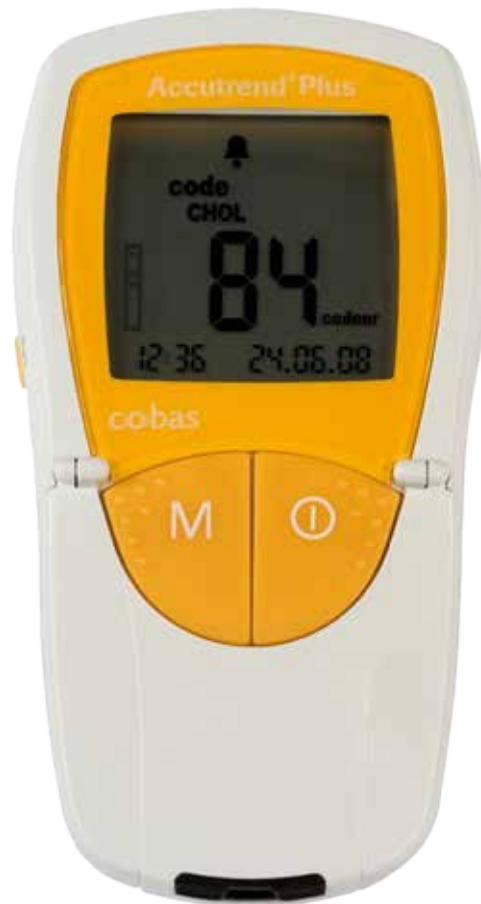

- The TRUEresult Twist glucose meter is ideal for quick and easy results on the go
- The blood test meter is very small and fits onto the top of the test strips pot which can make blood testing more simple, particularly if you're travelling, shopping or dining out
- No Coding - eliminates a step that can lead to inaccurate results
- Simple and fast use, as it only requires a 0.5 microlitre sample size with results taking just 4 seconds
- You can set up 4 testing reminders and the ketone alarm will warn you when blood sugar rises above a certain level
- Easy-to-Read Display - for easy viewing of test results
- Memory capacity: 500 tests
- Strip Release Button - eliminates handling of strips after testing
- The TRUEresult twist exceeds the ISO minimum criteria for accuracy with 100% of the results within ISO limits
- Lifetime warranty

SP300M Hand Held Pulse Oximeter with Adult Probe

- The SP300 is very easy to use, yet full of features with simple menu selection buttons
- At-a-glance analysis of SpO2 and Pulse Rate
- Portable, compact and reliable and can be widely applied to a clinical environment, hospital use, medical first aid departments or serious home use
- Can continuously monitor, spot check, replay the data in real time, and display SpO2 plethysmograph
- High resolution large 2.8" TFT screen displays SpO2, PR, waveform and pulse bar
- Adjustable audible and visual alarms - Bright coloured alarm lamp on front of unit, separate from the screen
- Very easy to use menu system for adjusting settings and features
- Battery-low indicator
- Adjustable backlight
- Automatic power-off function
- Lock function to prevent keys from being accidentally pressed
- Robust attachment for sensors to main unit, prevents accidental removal of cable
- Lock prevents unauthorised removal of batteries
- Allows 127 different patient IDs
- 72-hour data storage and review
- The large built-in screen allows you to review the recent results as well as instantly view average SpO2 and PR
- Even on-screen graphs are easy and clear to display
- Audible alarm suppression - can be silenced for 2 minutes
- MedView software & USB cable/Bluetooth connectivity for further data analysis on a PC
- Supplied with 3 AA alkaline batteries
- Supplied with reusable adult finger sensor probe
- SpO₂ Range 70%-100%

CODE	ITEM
DE/246	SP300M Hand Held Pulse Oximeter with Adult Probe

BCI Spectro2 10 Pulse Oximeter with Adult Probe

- The BCI SPECTRO2 10 leads the way with one of the largest displays on the market, durable construction, and easy one-handed operation. It is ideally suited for spot-checking in home care, primary care, emergency & transport settings & other clinical environments, as well as during sleep screening or walk tests
- It'll even store at least 144 hours of trend data for a combination of all 99 available patient record numbers.
- Large, bright, easy-to-read LED for at-a-glance assessment
- Unique on-board cradle to store and protect finger sensor
- Multiple power options
- Compatible with Docking Station, Attachable Printer, and BCI spot-check sensor
- Pulse amplitude Index (PI)
- Low battery indicator
- Durable, reliable performance you expect from the BCI brand
- Comfortable ergonomic design allows easy one-handed operation
- Stores patient data for transfer to PC for improved efficiency and documentation
- Three-year warranty
- Dimensions 8.5 x 15 x 4.5cm
- Weight - 340g including four "AA" batteries

CODE	ITEM

HS10A Handheld Pulse Oximeter & Reusable Adult Probe

- Handheld Pulse Oximeter & Reusable Adult Probe with protective rubber case.
- Anti-movement digital signal processing technology
- Accurate pulse oximetry measurements during motion and low perfusion
- Perfusion index and signal quality index indication
- Compact and lightweight
- Accurate, reliable and durable
- Compatible with lithium and alkaline batteries
- Dimensions: 7.2 x 14.2 x 3.2cm

CODE	ITEM
DE/249	HS10A Handheld Pulse Oximeter & Reusable Adult Probe

SP302 Ruggedised OxyWatch Fingertip Pulse Oximeter

- The pulse oximeter is a very important and common device
- to check patient blood-oxygen saturation (SpO₂) levels and
- pulse rate. As a portable, non-invasive, small, compact,
- simple, reliable and durable physiological monitoring device,
- the fingertip pulse oximeter greatly enhances patient care.
- It is widely applied at home and hospital (including clinical use in internist/surgery, anesthesia, intensive care, etc).
-
- "Ruggedised" silicon housing adds an extra protective layer around the body of the oximeter
- OLED displays SpO₂, PR, Plethysmogram and pulse bar
- 6 display modes; adjustable brightness
- Automatically power off; battery-low indicator
- Suitable for adult and paediatric
- Requires 1 x AAA battery
- Battery Life: Approx 8 hours (battery capacity: 1200mAh)
- Weight Approx 50g

CODE	ITEM
DE/223	SP302 Ruggedised OxyWatch Fingertip Pulse Oximeter

SP-2101 Digital Finger Tip Pulse Oximeter with Colour OLED Display

The SP-2101 has a low profile design and is extremely lightweight. The large, colour Organic LED display offers superb visibility in all lighting conditions, including direct sunlight and the brightness can be adjusted to suit individual applications.

This durable and compact unit utilises 12 bit processing technology enabling a fast 'true reading' response and facilitates low perfusion capabilities.

The SP-2101 is an extremely economical piece of equipment for the spot monitoring of SpO₂ and pulse rates and can be used in a variety of environments, from use in hospitals, paramedic applications, clinics and dental surgeries through to spot-monitoring before, during and after exercise.

- Clear and bright, colour OLED display
- Display can be viewed in 4 rotations
- Large, clear Pleth waveform is displayed on 2 rotations
- Large digit display formats
- Colour coded signal quality and signal strength indicator
- Adjustable brightness
- 12 bit processing facilitates low perfusion capability
- Meets ISO 9919:2005 Standards; shock, vibration, drop and water ingress tests

G3H Patient Multi-Parameter ECG Monitor

SUPPLIED WITH RED CARRY CASE

The G3H is an affordable, portable patient monitor ideal for use on the move. It's compact size and wealth of features lend it the versatility for use in a wide spectrum of environments where comprehensive patient monitoring is vital.

- Display: 8.4" colour TFT LCD screen with maximum 7-waveform display
- Portable, compact, lightweight
- Integrated carry handle for mounting on an ambulance trolley or hand rail
- Easy-to-operate user interface
- Freeze frame option to identify anomalies in patients condition
- WAN communication port to network the monitor with a central monitoring system - ideal for remote monitoring & physician diagnosis
- Optional built-in wireless networking function
- Battery: Rechargeable high-energy built-in battery
- Low power consumption with standby mode
- Continuous working time > 1 hour (full battery and measuring blood pressure every 10 minutes)
- Supports external printer to record graph and trend
- Adjustable vital signs alarm (high & low value)
- Standard configuration: ECG, HR, PR, SpO₂, ST analysis, RESP*2 (RA-LL impedance and nasal cavity), NIBP (with venous punch), TEMP*2(surface and rectal type), Drug dose calculation
- Also available with built in 50mm thermal printer

G3D Multi-Parameter 12-Lead ECG Patient Monitor

CALL TODAY FOR A FREE NO OBLIGATION DEMONSTRATION

LEASING AVAILABLE

The G3D Multi Parameter Portable Patient Monitor from SP Services combines compact size with the functionality usually reserved for higher-end monitors

The G3D Monitor is similar to our G3H Portable Patient Monitor, but comes with more features such as 12-Lead ECG capability and a larger 12.1" colour LCD screen.

- Especially suitable for use in an emergency or the operating room
- Unique thoracic impedance & nasal tube double model respiration test method (when patient can not lie quietly).
- 12.1" colour LCD screen: Bright screen with wide viewing, 8 waveforms can be displayed on the same screen.
- Streamlined modern design with foldable handle
- Multi-language interface selection
- User-friendly and man-machine dialogue interface with pop-up menus, dialogue boxes & rotary mouse etc.
- Low-power consumption design with standby mode
- Built-in rechargeable high-energy battery
- Continuous working time > 1 hour when battery full & measuring blood pressure every 10 minutes
- Blood pressure measurement quickly and accurately with venepuncture function
- Advanced digital technology, accurately measure SpO₂ in low perfusion situation
- Drug calculation, ST-segment detection, pace maker and arrhythmia analysis
- Display formats include OxyCRG diagram, 7-lead ECG waveform & large-font mode
- Can store 5 kinds of user-defined display formats
- Sound and light integrated alarm with adjustable parameters
- Suitable for adults, paediatrics & neonates
- Can review history data of 360 hours
- Applications in bedside and delivery monitoring; Widely used in patient room, emergency room, operation room, PACU, ICU, CCU, etc.
- WAN communication function to network with central monitoring system for diagnosis, maintenance and software upgrades.
- Printing of data, waveform, trend tables and trend diagram
- Also available with built in 50mm thermal printer

DE/356	Rycom Non-Contact Thermometer

ThermoFocus 0800 Infra-Red Hospital Version

- ThermoFocus 0800 Infra-Red Thermometer is a specially designed non-contact medical device used within hospitals and medical environments
- ThermoFocus has been designed with Specialist AQCS and MQSC technology to ensure that it is efficient and easy to use
- Stays at the correct temperature even when the environmental temperature changes
- No need to sterilise just point it to the centre of the forehead
- Easy to use, quick & effective
- Hygienic and no need to sterilise
- MQSC software for calibration
- Easy to store
- Certified medical device
- Easy button layout
- Stores previous readings automatically

CODE	ITEM
DE/354	ThermoFocus 0800 Infra-Red Hospital Version

ThermoFocus Infra-Red Clinical Thermometer

- This 'contact free' thermometer is used by medical professionals when trying to diagnose serious conditions
- The ThermoFocus Instant Read Infrared Clinical Thermometer is the perfect addition to your kit
- Provides a quick, easy to use way to check for fevers and the early onset of more serious medical problems
- Fast - Thermometer reading in 1 second
- Easy to Use - One button operation
- Clinically Accurate - Meets or exceeds strict ASTM and CE accuracy requirements
- Compact - Fits in purse, pocket or First Aid Kit
- No disposable probe covers necessary
- Large LCD - Improves visibility
- Additional Features - Measures surface temperature (baby's bottle, bath water, etc.) As well as ambient room temperature

Penlight Torches

CODE	ITEM
DE/001	Disposable White Penlight with Pupil Gauge
DE/002	Reusable White Penlight - with Batteries
DE/003	Reusable Cobalt Blue Penlight with Pupil Gauge
DE/493	Disposable Penlight - Hot Pink

- High quality bright light to aid diagnosis

CODE	ITEM
DE/491	Coloured Disposable Penlights - Pack of 6

Stainless Steel Penlight with Pupil Gauge

- The deluxe reusable pen torch contains a quality stainless steel shell and features a pupil gauge and pocket clip
- Supplied complete with 2 x AAA batteries in blister pack
- With pupil gauge
- Dimensions: 136 x 12mm

CODE	ITEM
DE/495	Stainless Steel Penlight with Pupil Gauge

Spirit Chrome Penlight Torch

- Chrome exterior finish with measuring scale and pupil size gauge
- High light output, powered from 2 x AAA batteries (not supplied)
- Pocket clip on/off control
- Domicillary pack includes pentorch with aural adaptor, 3 speculums and compact case

CODE	ITEM
DE/008	Spirit Chrome Penlight Torch

Patella Hammer

- Developed at the National Hospital for Neurology in Queen Square London, this hammer is perfectly suited for eliciting a full range of reflexes
- Features a Tapered handle base which enables plantar reflex testing.
- The bumper ring is made of durable PVC plastic
- 11.5" (29cm) handle
- Flexible Head
- Plastic Handle
- Easy to Clean

CODE	ITEM
DE/005	Patella Hammer

Piccolight E56 Diagnostic Set

DE/672

- PICCOLIGHT F.O otoscope with 3x magnification with intensiveXenon lamp
- PICCOLIGHT ophthalmoscope with green filter for directophthalmoscopy with aspherical precision optics, correction lenswheel, +/- dioptres, six diaphragms: slit diaphragms, large circle, small cir
- This product is ideal for a practise nurse or a graduating GP

CODE	ITEM
DE/672	Piccolight E56 Diagnostic Set - Blue
DE/674	Piccolight E56 Diagnostic Set - Black

Piccolight Fibre Optic Otoscope

- An elegantly designed, high quality instrument
- Delivers an intensive bright white circular light
- High grade fibre optics and halogen light source
- Built in pocket clip and integrated on/off switch
- Available in 2 colours
- Supplied with 20 disposable funnels & nylon pouch
- Requires 2 x AA batteries (not supplied)

CODE	ITEM
DE/122	Piccolight Fibre Optic Otoscope - Blue

QUALITY - DURABILITY - PERFORMANCE

Founded in 1946, family owned, rich in tradition and today international market leader in a complete range of diagnostic instruments.

Heine products meet international standards (ISO/CE) and represent the leading edge in precision and ergonomic design.

Ongoing dedication to research and development has created a solid and diverse technology base for continued quality and product leadership. Over 500 employees worldwide contribute to this success.

SP Services stock the complete Heine range. If you need a specific Heine product, please call our Customer Services department who will be happy to assist you.

DE/100

Heine K180 Ophthalmoscope

- Heine K180 Ophthalmoscope and handle with soft pouch
- Precision Heine optics
- XHL xenon halogen technology - bright white light gives a clear retinal image
- Range of lenses - 27 lenses from -35D to +40D
- Brilliant image even at high correction
- Ergonomical shape - the instrument fits the orbita comfortably
- Soft orbital rest steadies the instrument and protects your glasses
- Maintenance free, dust-resistant housing
- High-impact polycarbonate housing for durability
- 2.5v battery handle

Heine K180 Fibre Optic Oscope

- Heine K180 Fibre Optic Oscope and handle with soft pouch
- Fibre Optic (F.O) illumination
- Homogeneous, reflex-free illumination of ear canal and tympanum
- Constructed of light, high-impact polycarbonate
- Swivelling viewing window built into instrument
- Insufflation port for reliable test of tympanic mobility
- 3x magnification scratch resistant viewing window
- 2.5v battery handle

Heine Mini 3000 Pocket Diagnostic Kits

The Mini 3000 Pocket Diagnostic set includes a Mini 3000 Otoscope and Ophthalmoscope in a hard case

Heine Mini 3000 Otoscope - Fibre Optic Version

- Fibre Optic illumination.
- Enhanced Xenon Halogen illumination for very bright, clear illumination.
- 3 x rotating magnification window for razor sharp images
- Insufflation port for pneumatic testing

Heine Mini 3000 Otoscope - LED Version

- Maintenance-free, no need to ever change the bulb
- LED thermal management for consistent light output
- Twice as bright as Xenon halogen instruments
- Battery performance indicator
- Up to 10 hours battery operation time

Heine Mini 3000 Ophthalmoscope

- Outstanding optics provide crisp retinal detail
- -20 to +20 with 18 lenses. -/+1 to 4/+4 in single steps
- 5 apertures for a full diagnostic capability
- Large spot, small spot, fixation star for eccentric fixation
- Hemispot for small pupils, red free filter.

Handles x 2

- Chrome finish upper section with non slip ribbed plastic lower section.
- Ergonomic oval design provides extremely comfortable grip for all hand sizes
- Integral pocket clip with auto off.
- Metal threaded connector provides secure long lasting fit
- Takes 2 x AA batteries

CODE	ITEM

Heine EN100 Wall Unit

- An attractive modern design to keep your instruments in the right place, instantly ready for use
- Includes a K180 Otoscope and K180 Ophthalmoscope
- Soft start technology
- Provides a constant 3.5v output voltage
- Advanced, ergonomic handle design
- Spiral cords with a working radius of up to 3m

CODE	ITEM
DE/964	Heine EN100 Wall Unit

Heine EL10 LED Examination Light

- Exceptionally bright light for everyday use
- Heine examination lights incorporate the latest and most reliable in illumination technology
- A precision optical system with three specially aligned lenses produces an absolutely homogeneous and sharply focused field of illumination
- Light intensity can be regulated continuously between 6,500 and 45,000 Lux
- Spot size can be adjusted in a diameter between 8.5 and 14cm
- The coiled gooseneck keeps the light exactly in the required position
- Wall mounted
- Easy and efficient to clean and disinfect

CODE	ITEM
DE/965	Heine EL10 LED Examination Light - Wall mount

Nurses Mini Tuf Cut Shears - 5.5" - Hot Pink

- These 5.5" utility scissors are made of Japanese 420 stainless steel
- The serrations on these shears are milled, not stamped, for cutting through tough material
- Autoclavable to 290°F / 143°C

CODE	ITEM

Leather Side Scissor Pouch - Pink

- Hand made pink leather pouch
- Horizontal pouch placement for paramedic shears
- Will fit most utility belts
- Supplied unknitted
- Dimensions: 150 x 60 x 6mm

CODE	ITEM
LA/025	Leather Side Scissor Pouch - Pink

Mark 5 Leather Pouch - Pink

- Top quality leather for durability, remarkablysupple for comfort
- Four built in pockets
- Rivet construction reinforces stress points
- Formed pockets hold instruments securely in place yet instantly accessible
- Extra large snap open belt loop for easymounting

CODE	ITEM
LA/006	Mark 5 Leather Pouch - Pink

Multiflow Regulators

- Bull nose and pin index type regulators
- 11 individual flow rates from 1-23 lpm
- Optional 25 lpm purge
- Suitable for use on neonates to adults
- Requires servicing every 5 years
- Favoured by many ambulance services because of its amazing strength
- Spares available on request
- Easy to read cylinder contents gauge

CODE	ITEM
OT/013	Multiflow Regulator - Pin Index
OT/014	Multiflow Regulator = Bull Nose

Oxygen Cylinders

- D-size aluminium oxygen cylinder (340 ltrs)
- Suitable for use with pin index regulators

CODE	ITEM
OT/021	Oxygen Cylinder - Black & White UK Spec - Full
OT/039	Oxygen Cylinder - Silver & Green USA Spec - Empty

Cylinder Keys

CODE	ITEM

OT/027	Deluxe Ratchet Type Key
OT/029	Plastic Spanner

Elite Oxygen Conserving Device

- The Sabre Elite oxygen conserving device is an innovative way of delivering oxygen to the patient, whilst conserving the gas and extending the duration of the cylinder
- Totally pneumatic, requires no external power source
- On demand oxygen is delivered to meet patient needs
- Matches the delivery performance of constant flow oxygen over a range of flow rates
- 8 flow settings
- Easy to change between cylinders, medium pressure break ensures maximum user safety
- Easy to use; a simple, single connection of a cannula to the therapy outlet of the device is all that is required

CODE	ITEM
OT/152	Elite Oxygen Conserving Device

Resus Regulator with Oxygen Therapy Outlet

- Multiple Flow from 0-15 L/min
- BS Schrader check valve and Multiflow click control combined into one regulator
- Clear flow rate indicator
- Provides outlets for both resuscitation and oxygen therapy

CODE	ITEM
OT/161	Resus Regulator with Oxygen Therapy Outlet - Pin Index
OT/162	Resus Regulator with Oxygen Therapy Outlet - Bull Nose

Pin Index & BS Valve Oxygen Regulator

- BS Schrader check valve for piped oxygen systems
- Integral pressure regulator and contents gauge
- Fits C, D, E, and any pin index type oxygen cylinder

CODE	ITEM
OT/015	Pin Index & BS Valve Oxygen Regulator

Bull Nose & BS Valve Oxygen Regulator

- BS Schrader check valve for piped oxygen systems
- Integral pressure regulator and contents gauge
- Fits F, G, and any bull nose type oxygen cylinder

CODE	ITEM
OT/016	Bull Nose & BS Valve Oxygen Regulator

Single Glass Tube Flowmeter & BS Probe

- BS probe for use with piped oxygen systems
- Floating ball flow control device with a probe connector and graduations accurately marked within the outer cover
- Flowmeter 0-15 L/min
- Universal fir tree outlet

CODE	ITEM
OT/017	Single Glass Tube FlowMeter & BS Probe

Mediflow Ultra II Probe Click Control

- BS therapy probe for use with piped oxygen systems
- Robust design, simplicity of operation and accuracy provide significant benefits over traditional devices
- Adjustable flow rate of 1-25 L/min
- Higher degree of flow rate accuracy

CODE	ITEM
OT/018	MediFlow Ultra II Probe Click Control

GCE Medivital Combivalve with 2L Oxygen Cylinder

- Suitable for use in homecare, emergency, industrial and hospital situations
- Latest technology, highest shock resistant gauge
- Guard design provides maximum protection for the valve
- Shut off valve with clear colour coded open/closed status
- Compact and lightweight design - less than 1.15kg
- For use with oxygen, up to 200 bar cylinder pressure
- 2, 6, 15 and 25 lpm flow rate
- Supplied with integral 2l cylinder
- Includes bag, mask, & tubing

Zen-O Portable 24 Cell Portable Oxygen Concentrator

- Enables patients with respiratory disorders to better manage their oxygen therapy
- Delivers up to 2 litres of oxygen per minute in either pulse or continuous flow
- Designed with an easy to replace sieve bed, saving time and money.
- Easy to use
- Holds up to two 12 cell batteries
- Visual and audio alarms if oxygen concentration drops below 82%
- 3 Year Warranty
- Weight 4.66kg
- Dimensions: 21.2 x 16.8 x 31.3cm
- Supplied with accessories including charger, carry bag & pull cart for increased mobility

CODE	ITEM
OT/700	Zen-O Portable 24 Cell Portable Oxygen Concentrator

First Responder AED Backpack

Designed by the medical team at SP Services, this AED kit will be suitable for all First Responders who are called to “collapse query cause”

Oxygen Therapy

Oxygen is the most important single substance in animal biology. It constitutes nearly 50% of the mass of the planet, 21% of the air we breathe, 50% of rock and 89% of water and yet it took man a suprisingly long time to discover its significance in terms of combustion, respiration and animal metabolism.

Oxygen is essential for normal respiration in aerobic organisms. Upon entering the lungs, O₂ molecules dissolve in the lipid and aqueous phase of tissues and diffuses across alveolar membranes and into alveolar capillaries. The vast majority of oxygen is bound to haemoglobin and only a small fraction, less than 2% is dissolved in the plasma. Following the transport to various tissues, oxygen diffuses into the cells for metabolism.

Normally, a reduction in arterial oxygenation is compensated for by an increase in cardiac output to avert tissue hypoxia.

When this ceases to be adequate, tissue hypoxia is accompanied by acidosis, a fall in standard bicarbonate and pH. Oxygen therapy becomes necessary when the arterial oxygen tension falls below 50mm Hg

The objective of oxygen therapy is to increase arterial oxygen tension, so that normal O₂ delivery to the tissue is restored. The essential aim of oxygen therapy in respiratory disorders is to prevent further clinical deterioration. Patients rarely remain viable with arterial blood values below 25mm Hg.

Oxygen therapy devices fall into 2 catagories:

Variable Performance

(Concentration Masks, Non-Rebreathing Masks, Nasal Cannula and Nasal Catheters)

These devices administer uncontrolled oxygen therapy because the patient creates the inspired mixture by breathing.

Fixed Performance

(Venturi Type Masks)

Create a constant proportion of air/oxygen mixture in excess of patient inspiratory flow rate.

Medium Concentration Mask

Small capacity, variable performance mask designed for use when precise control of inspired oxygen concentration is not mandatory. The rates below are dependant on the patient's breathing rate and tidal volume.

FLOW RATE (L/MIN)	2	4	6	8	10
OXYGEN CONCENTRATIONS	28%	35%	40%	50%	60%

Non-Rebreathing Mask

Sometimes known as the Trauma Mask, a Non-Rebreathing Mask provides a high concentration of oxygen and the reservoir bag allows for adequate oxygen to be available to meet the unpredictable needs of the patient. At a flow rate of 15 litres per minute an oxygen concentration of up to 99% can be achieved depending on breathing pattern and tidal volume.

HyperVent Bag

- For the treatment of patients with hyperventilation
- An ISO 9001 manufactured and CE marked product
- Features an integral mouthpiece
- A medically clean alternative to paper products
- Includes a filter membrane, prevents contamination
- Reduces the risks of infection & inhaling foreign bodies
- Includes a port allowing air to be entrained reducing the risk of hypoxia

CODE	ITEM
OT/088	HyperVent - Single
OT/089	HyperVent - Box of 5

Viral Filters & Spacers

- Clear-Guard Midi Breathing Filter by Intersurgical
- Designed to prevent microbial cross contamination via anaesthetic or ventilator breathing
- Features a 22mm Female port on one end and a combined 22mm Male and 15mm Female port on the other end
- Compatible with Nitrous Oxide Systems and BVM Bag-Valve-Mask Resuscitators
- 99.9% Filter Efficiency

CODE	ITEM

Ariane Power Nebuliser

The Ariane Power Nebuliser is compact, robust and modern in design with a plastic case in an attractive colour. With a two speed Neboplus ampoule this unit offers the facility to select the nebulisation speed. This ensures fast nebulisation time and increasing treatment efficiency whilst allowing for a reduction in medicine waste.

Includes:

- 1 x Neboplus Ampoule
- 1 x Adult Mask
- 1 x Child Mask
- 1 x Adult Nose-Piece
- 1 x Child Nose-Piece
- 1 x Mouthpiece
- 1 x Tube
- 1 x Filter

CODE	ITEM
OT/069	Arriane Power Nebuliser

SP Mesh NB-810B Portable Nebuliser

- Pocket size and easy to carry
- Patented technology to allow operation in all directions
- Completely silent in operation
- Automatic turn off when medicine is depleted
- Particle size: MMAD 5 microns
- Capacity of medicine cup: Approx 8ml max and approx 0,5ml min

CODE	ITEM
OT/071	SP Mesh NB-810B Portable Nebuliser

Meganeb Plus Nebuliser

OT/064

- New, reliable, low noise, high power compressor (max. 2.5 bar - approx. 12 litres air/min)
- Maintenance free and extremely safe with a thermal protection system against overheating
- Robust and practical with carrying handle, accessory compartment and easy-clean styling
- Cable storage separate from accessories (for improved hygiene)
- Anti-vibration feet
- Professional filter system guarantees purity of the air entering the compressor

CODE	ITEM

SMART BAG Disposable BVM Resuscitator

SMART BAG® The Most Revolutionary Advance in Bag-Valve-Mask Performance in Over 40 Years!

The SMART BAG has been designed to allow the provision of consistent ventilations while almost completely eliminating the risks associated with conventional BVM ventilation. The unique actuating mechanism hidden inside the neck bushing of the SMART BAG actually responds to the rescuer and the patient.

By responding to the rescuer's squeeze and release of the BVM, the SMART BAG limits the excessive flow of gas into the patient's airway, significantly reducing the risk of gastric insufflation by effectively lowering the airway pressure generated. In a normally compliant and resistant airway, the airway pressure is limited to below the esophageal sphincter opening pressure of 19cm H₂O.

The response by the SMART BAG is proportional to the rescuers

squeeze. The harder the squeeze, the greater the restriction to flow. This alerts the rescuer to ease up on the squeeze, reducing the effort required, resulting in the airway pressure being kept to the minimum to achieve adequate ventilation. At no time is the flow of gas into the patient compromised by the SMART BAG, allowing the rescuer to ventilate even the stiffest lung or most restrictive airway.

To assist the rescuer a visual warning of incorrect ventilation technique of the SMART BAG is provided. If the SMART BAG is squeezed too hard, the SMART BAG responds by closing the valve to lower the Flowrate. Should this occur, the red pressure actuating indicator moves to the forward position in the neck of the patient valve producing a visual warning of improper technique.

Features at a Glance

- Available in two models (Adult & Child/Infant)
- Transparent Facemask allows for easy monitoring of skin colour, signs of vomitus or body fluids
- Complete with Oxygen Reservoir System and Oxygen Tubing
- Controls Flowrate
- Controls Airway Pressure
- Controls Ventilation
- Reduces the Risk of Gastric Insufflation
- Designed to allow the provision of consistent ventilations while almost completely eliminating the risks associated with conventional BVM ventilation
- Responds to rescuers squeeze of the bag
- Responds to changing airway conditions
- Provides visual warning of improper technique
- Single Use

RE/510

- Contains a comprehensive range of emergency medical equipment suitable for a wide range of emergency situations
- Bag features shoulder and back straps, detachable colour coded pouches, exterior pockets
- Made from tough, water resistant material
- Merlin paramedic resus bag
- 3 x Merlin Silicone re-usable resuscitators (adult, child & infant sizes)
- Res-Q-Vac emergency hand-held aspirator (adult & paediatric attachments)
- 7 Guedel airways (000 - 4)
- Laryngoscope set (handle & 4 x Macintosh blades - sizes 1-4)
- Merlin E-Mask
- 2 x Magill Endotracheal forceps (adult & child sizes)
- Tuf-cut scissors
- Sharps bin
- Aerosol therapy set with mask
- Emergency foil blanket
- 4 x ET tubes - cuffed (sizes 5.5mm, 7.5mm, 8mm & 8.5mm)
- Accident hammer
- Tytan Sprague stethoscope
- Quick release tourniquet
- 6 x disposable pen torches
- Spencer Wells forceps 5" straight
- Dressing scissors 5" sharp/sharp
- 3 pairs of nitrile gloves (sizes small, medium & large)
- IV giving set

Thomas EMS Paediatric Case

- Contains eight separate high visibility pouches designed to treat all paediatric patients up to 36kg
- Inside lid section consists of two large clear pockets to store multiple paediatric collars and larger equipment
- Fold down front pocket to hold all mask sizes from neonate to small adult
- Separate chamber to store all non weight specific paediatric equipment
- Supplied fully kitted
- Dimensions: 350 x 500 x 240mm

O-Two CPAP with Adult Mask and Harness

The O-Two CPAP system is a disposable respiratory aid device intended for use in the hospital and pre-hospital environment to provide non-invasive ventilation to the patient in respiratory distress.

When connected to a regulated oxygen therapy gas supply and attached to the patient via a face mask, the device provides a constant positive airway pressure in the patient's lungs throughout the respiratory cycle. This is achieved by selecting flow rates on the therapy flow control to create the desired rise in the baseline level.

The CPAP from O-Two is such an innovative design it was recently awarded the 2011 EMS World Innovation Award.

**QUANTITY DISCOUNT AND
CONTRACT PRICING AVAILABLE**

- Has a unique high visibility CPAP valve with integrated flow nozzle and crush resistant oxygen tubing
- Completely disposable
- The smallest and lightest on the market
- Is an "Open" system allowing the patient suffering from respiratory distress to breathe on ambient air with no restriction to volume or flow without feeling compromised or restricted
- Has the longest cylinder duration of all disposable CPAP devices currently available (e.g. at 5.0 cm H₂O of CPAP the cylinder duration is 52 minutes vs. other devices that average 28 minutes).
- Is simple-to-apply and easy-to-use and requires minimal training – place the mask on the patient's face and adjust the regulators adjustable therapy flow to select the desired level of CPAP
- Allows the provider to "Titrate to Effect" in precise increments based upon the patient's needs.
- Provides the highest range of settings available (from 5cm H₂O to 20 cm H₂O) without the need for costly separate interchangeable PEEP valves or special "High Flow" therapy regulators being required
- Has clearly marked CPAP settings and corresponding regulator therapy flow requirements
- Provides a minimal pressure drop on inspiration and minimal pressure spike on expiration producing a more uniform CPAP pressure throughout the respiratory cycle creating a lower work of breathing (WOB) for the patient
- Produces accurate CPAP pressure based upon the oxygen flow rate selected on the regulator eliminating the need for a separate pressure manometer using our patented Vectors Flow Nozzle Technology
- Has minimal pieces for ease of assembly - CPAP valve components are preassembled and glued which reduces set up time and reduces the potential for incorrect assembly
- Has a neoprene head harness system that is easy to apply, comfortable and prevents excessive sweat, slippage on the patient's head and does not pull on hair
- Uses industry standard mask connections – compatible with most respiratory masks and accessories
- Size 5 mask included
- Supplied in a pack of 10

RE/282 O-Two CPAP with Adult Mask and Harness - Pack of 10

e700 Electro Pneumatic Transport Ventilator

The e700 ventilators usher in a new era in controlled ventilation for resuscitation and patient transport!

These electronically controlled, pneumatically powered ventilators provide a range of ventilation solutions for all types of patient requirements and all levels of pre-hospital and in-hospital healthcare professionals.

The range of ventilation solutions offered by these devices cannot be compared to any other products of their type.

With a long lasting (18 hour) battery life, these remarkably small and lightweight (2.4kg) ventilators only require attachment to a regulated oxygen supply and a transport ventilator circuit for immediate use. The easily replaceable battery can be charged while inside the ventilator or can be removed for charging and quickly replaced by a fresh battery pack.

- When long patient transports are required, the e700 provides the range of ventilation modes that meet the needs of the patient requiring controlled or assisted ventilation
- With volume modes as well as CPAP, you are assured of having the right option to meet the requirements of your chosen ventilation strategy
- The addition of BiLVL Ventilation, Pressure Support and Pressure Control, the functions offered by the e700 provide the healthcare professional with additional flexibility in their set up adjustment
- The e700 features additional modalities to truly emulate the ventilation options offered by standard intensive care ventilators
- These provide the ventilation modes necessary to maintain continuity of care during patient transport
- The “e” series of ventilators are ideal for long transports where both electrical and oxygen supplies are always a critical concern

CALL TODAY FOR A FREE NO OBLIGATION DEMONSTRATION

CODE	ITEM
RE/291	e700 Electro Pneumatic Transport Ventilator

E500 Electro Pneumatic Transport Ventilator

The e500 transport ventilator provides trained individuals with a safe and effective means of providing controlled ventilation during patient transport, respiratory and/or cardiac arrest

- The e500 ventilators are specifically designed for the demands of emergency, rescue, resuscitation and critical patient transport
- The addition of CPAP improves the flexibility of use for this model
- Simple and quick to set up, it provides a range of 12, physiologically normal, tidal volume/ventilation frequency setting selections for children over 15kg to large adults
- In addition to the patient care benefits the “e” series of ventilators provide excellent low gas consumption, long battery operating time (18 hours) and light weight (2.4kg)
- The “e” series of ventilators are ideal for long transports where both electrical and oxygen supplies are always a critical concern
- The e500 and e700 ventilators provide flexibility in your choice of functionality and application

Sabre Ease Demand Valve, Hose & BS Probe

- A self administered system of pain relief delivering a 50% nitrous oxide & 50% oxygen analgesic gas
- Can be used with either a face mask or mouthpiece
- New 'Ease' patient demand valve will deliver a flow of 300l/min but at an inspiratory resistance of 1/3 as required by the British Standard
- Exceeds BS4272 British Standard
- Exceptionally light, this product is designed to administer effective pain relief in a wide range of medical situations
- Designed with reliability, robustness, easy servicing and maintenance in mind
- Designed with weight, size, performance and requirements expressed by modern medical professionals in mind
- Demand valve is ergonomically designed so that the patient does not block the exhale ports when holding the valve
- Places minimum physiological loading on patients requiring pain relief
- Easy to operate even for distressed or frail patients
- Unit incorporates a test/vent button for checking unit prior to use and venting the unit following use
- Low exhale resistance making the SABRE EASE the most user friendly unit currently available

EzyVac Manual Suction Pump

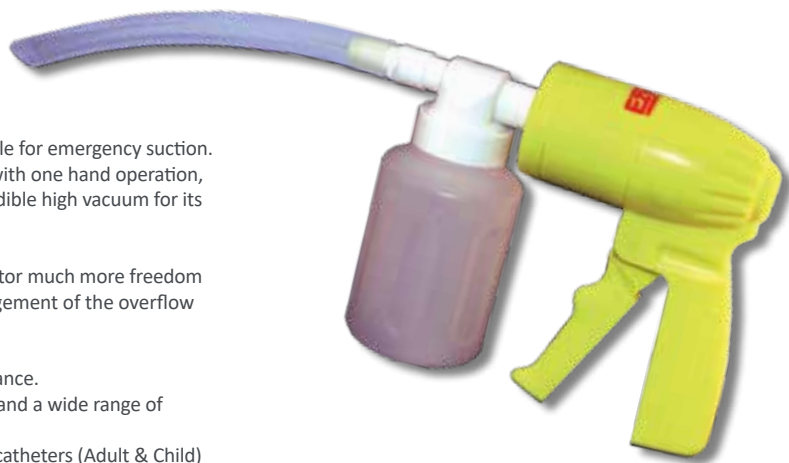

The EzyVac is probably the most complete hand-held pump available for emergency suction. This state of the art light weight, portable device can be powered with one hand operation, leaving the other hand free for different tasks. It produces an incredible high vacuum for its size and is extremely versatile.

The EzyVac was designed with a 100° swivel, which gives the operator much more freedom to manoeuvre around tight situations and avoids premature engagement of the overflow mechanism.

The simple design ensures effective operation and simple maintenance. A cost effective alternative offering convenience and performance and a wide range of features and benefits.

Comes complete with disposable collection canister and 2 suction catheters (Adult & Child)

- Fast and powerful performance - offering superior performance
- Compact and lightweight - takes up very little space in your kit bag
- No special storage conditions required
- Extremely easy to squeeze handle even for small hands
- Disposable 300ml collection container - no cleaning or sterilisation required
- Low cost operation and no need for regular maintenance

“EXCEPTIONAL VALUE FOR MONEY!”

SP Easy To Use Disposable Suction Unit

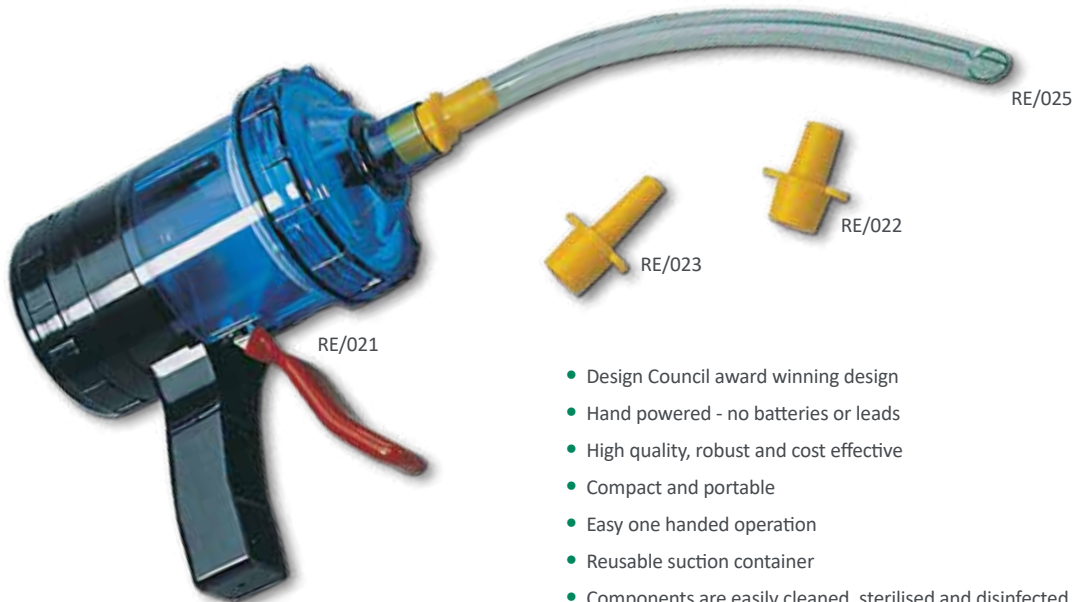

- The SP Easy to Use Disposable Suction Unit, complete with a large bore catheter, is a simple unit ready for use straight out of the bag
- A compact unit that allows easy suction of patients who have vomited
- Resilient silicone bulb performs reliably in even the harshest climates with no loss of suction
- Strong, compact bulb creates a minimum vacuum pressure of 110 mmHg
- A one-way valve will prevent backflow of collected fluids
- Collection bag holds over a litre of fluid
- Contoured suction tube tip prevents tissue damage during application
- Reliable, simple and inexpensive manual suction device for clearing airway obstruction
- Single use only

Laerdal Penguin Suction Device

- Babies' nasal passages can become blocked for many reasons including exposure to viruses or irritation from allergens
- Clogged nasal passages can interfere with babies' ability to feed, and in very young newborns, their ability to breathe
- Designed to clear babies' airways, the Penguin is made of one piece of silicone making it easy to clean and durable, able to withstand hundreds of uses
- The Penguin was developed to support basic newborn resuscitation courses like Helping Babies Breathe, aimed at improving newborn outcomes in developing countries

CODE	ITEM
RE/570	Laerdal Penguin Suction Device

Devilbiss Compact Suction Unit

- Designed for use in hospital, pre-hospital and home care settings
- It is suitable for adult, paediatric and neonate patient applications
- The 7305 is small and lightweight, but with a high performance capability that meets the high demands of the patient
- Complete with a padded carrying case and a 12V DC power supply cable
- Vacuum adjustments allow for 80-550 mm Hg and a free flow of 27 litres/minute
- Conveniently placed gauge for easy reading

SAM e.p.s (Emergency Portable Suction) Unit

CODE	ITEM
RE/230	SAM e.p.s (Emergency Portable Suction)
RE/169S	Disposable Serres Suction Bag - Single
RE/232	12/24v Powered Vehicle Mount Bracket
RE/233	240v Powered Wall Mount Bracket

- The SAM e.p.s (Emergency Portable Suction) aspirator offers a new benchmark in battery operated suction equipment
- Ideal for emergency services
- A simple single knob with vacuum settings for typical adult and paediatric medical procedures controls the unit
- Bright, clear 'easy-wipe' digital display indicates the vacuum level and battery status
- Operating the e.p.s is straightforward even when wearing gloves or other protective equipment
- Includes a high performance low energy pump, fast suction build up, onboard lighting, a unique rotating bottle system allowing the unit to be laid flat in difficult terrain
- The e.p.s is fitted with a specialist lightweight portable piston pump giving a maximum suction in excess of 550mm Hg and a flow rate above 32l/min
- At low vacuum levels the pump is whisper quiet to give minimal disturbance to the patient
- Fitted with an internal charger
- Includes Abbot container and disposable liner
- The efficient pump and an innovative power management system give the e.p.s an extended battery life of over 2 hours at maximum power with a single charge and in excess of 6 hours at lower settings
- Specifically designed following consultations with doctors, paramedics, resuscitation officers and other medical staff and is suitable for use in ambulances, general hospital wards & critical care

OB3000 Portable Suction Unit

- Smaller, lighter and more powerful than the market leader with 78% longer battery capacity
- Designed and built to the highest quality and meets all new and existing safety standards
- High specification unit
- 80 minutes capacity on free cycle usage
- Reusable collection canister or canister compatible with Serres liner
- Ergonomic exterior vehicle mounting system
- Internal micro processor for improved safety and clinical governance
- Powerful pump giving 33 LPM suction power and 800mbar pressure
- Lithium polymer battery (solid-non organic)
- Battery status indicator with no need to turn on the device
- Internal microprocessor monitors and logs system usage, indicating when service is needed
- Safety inspection reminder
- Analogic fluorescent vacuum meter, with mmHg scale upon request
- Compliant to all current norms, 93/42/CEE Directive and main reference norm ISO10079-1
- Weight 2.8kg
- Supplied with 12v in-vehicle charging lead. Mains charger available (optional extra) and charging wall bracket (optional extra)

Serres Conversion Kits

Following the demise of the Abbott range of liners and cannisters, most customers are now having to convert various brands of suction units over to the Serres type of liner/bag. This has proved to be very inconvenient and confusing for lots of our customers.

Serres Conversion Kits provide a simple solution to this problem, making it easy to use a Serres type liner/bag in you existing suction unit.

Please contact our customer services department for help in choosing the correct conversion kit for your needs.

iPAD SP2 AED with Manual Override

The new iPad SP2 is the latest in the range of Intelligent Public Access Defibrillators. The SP2 is an easy to use AED (Automatic External Defibrillator) which has a manual override function and is both compact and light, but at the same time able to deliver the features of a much larger and expensive AED.

The SP2 automatically reads the patient's electrocardiogram (ECG) and determines if a cardiac arrest that requires defibrillation has occurred. This ECG is also shown on the new larger colour screen, adding to its civilian usability by adding confidence in being able to see what is occurring whilst also hearing it through the voice prompts.

Features

- AED with manual override
- Fixed or escalating energy
- Colour screen
- ECG with sync
- Multi event data recording – 3 events, 17hrs each
- Easy data transfer via SD Card
- Free data analysis software
- One set of pads for both adults and children
- Ambient noise detector automatically adjusts voice prompt according to background noise
- Pre-connected 'smart' electrodes
- Rechargeable or disposable battery
- Waterjet Proof to IP55
- Complete with case, rechargeable battery, battery dock and electrodes as standard

iPAD SP1 Semi Automatic AED

The new iPAD SP1 is the latest in the range of intelligent public access defibrillators from one of the worlds leading manufacturers of clinical defibrillator monitors.

The iPAD SP1 is an easy-to-use Semi-Automatic External Defibrillator (AED) that is small, light, and portable. The AED automatically reads the patient's electrocardiogram (ECG) and determines if a cardiac arrest that requires defibrillation has occurred.

Designed to be used by minimally trained individuals, the iPAD SP1 is suitable for use almost anywhere that people gather, whether it's within the workplace, a shopping centre or a hospital, the iPAD SP1 makes saving lives easier than ever.

Easy to switch from adult to child mode without changing pads whilst a safety cover prevents accidental switching

- Simple switch to select adult or child mode
- Pre-connected 'smart' electrodes
- 'i' button technology
- Ambient noise detection
- Pad life indicator
- CPR detection
- Integrated pad storage
- Low cost of ownership
- No need to buy separate child pads
- Internal memory records 5 events
- Built in SD card port and IrDA port
- 7 year warranty on unit
- Supplied ready to go with 2 sets of pads, 2 AED starter kits, a 4 year lithium battery and a FREE carry case

Lifepak 15 Monitor / Defibrillator

LEASING AVAILABLE

MORE INFORMATION
ON THE SP WEBSITECALL FOR A NO
OBLIGATION
QUOTATION

- The LIFEPAK 15 monitor/defibrillator is the new standard in emergency care for ALS teams who want the most clinically innovative, operationally innovative and LIFEPAK TOUGH device available today
- The LIFEPAK 15 device balances sophisticated clinical technologies and supreme ease of use in a device that's tough enough to stand up to your most challenging environments
- The 15 integrates Masimo Rainbow SET technology that monitors SpO₂, Carbon Monoxide and Methemoglobin
- Includes a metronome to guide CPR compressions and ventilations
- Provides an option to escalate energy to 360J
- Continuously monitors all 12 leads in the background and alerts you to changes using the ST-Segment trend monitoring feature
- An entirely new platform, the 15 is powered by Lithium-ion battery technology, incorporates the SunVue display screen for viewability in bright sunlight, and data connectivity to easily and securely collect and send patient information

Key Features at a Glance

- Large full colour screen (8.4 inches diagonally)
- Dual-mode LCD screen with SunVue™ display, which the user can switch from full colour to high-contrast SunVue mode with a single switch
- Both AC and DC power options available, as well as the choice to use the latest lithium-ion battery technology, chargeable within the device itself, for up to 6 hours of power.
- The unit's two battery system requires no conditioning or maintenance and in addition, you can monitor the status and service life of your batteries using Lifenet® Asset (part of the Lifenet System data network), which can alert you to any potential issues
- P447 rating for continued use in wind, rain and other harsh environments
- Survives 30" drop tests (equivalent to dropping the unit from cot height)
- Shock absorbing handle
- Double layer screen
- Redesigned cable connections for added strength
- Self-checking feature alerts Physio Control if attention is needed, so on-site maintenance or repair, access to parts and highly trained service representatives are available 24/7
- The 15 platform is designed with specific flexibility to allow upgrades and evolution to meet new guidelines and changing protocols. This can help avoid costly upgrades and premature replacements, without losing speed or power

Lifepak LP1000 AED

- Rugged Construction - Rigorously drop-tested device and protective case and bumpers
- Vehicle Friendly - Designed to ride along in any vehicle without damage from continuous vibrations and other movement
- 360 Joules - Can escalate defibrillation power to an industry leading 360J
- cprMAX Technology - Minimizes CPR interruptions by allowing compressions to continue during AED charging
- CPR Countdown Timer - Provides direction for length of handson time for each CPR period based on system protocol
- ECG Capability - 3-lead ECG function is available when needed
- Shock Counter - Digitally records and displays delivered shocks for added insight
- Large Display - Large easy-to-read LCD screen provides more information at a glance
- Compatible Technology - Electrodes are fully compatible with all other LIFEPAK defibrillators and monitors

Lifepak CR Plus AED

- Designed with a simple two-step process that gives the first person to respond to a SCA victim the confidence they need to help save a life
- Easy to own and maintain
- Synchronized replacement of the electrodes and battery CHARGEPAK will keep your maintenance burden at a minimum
- Readiness display with four indicators let you know it's ready to do its job
- The fully automatic model of the LIFEPAK CR Plus AED is designed to deliver a shock only if it determines a heart needs it
- User interface includes voice prompts, audible tones and graphic prompts
- 8-year warranty on the LIFEPAK CR Plus AED
- Dimensions: 10.7 x 20.3 x 24 cm
- Weighs: 2kg

CODE	ITEM
DF/251	Lifepak CR Plus AED - Fully Automatic
DF/252	Lifepak CR Plus AED - Semi Automatic

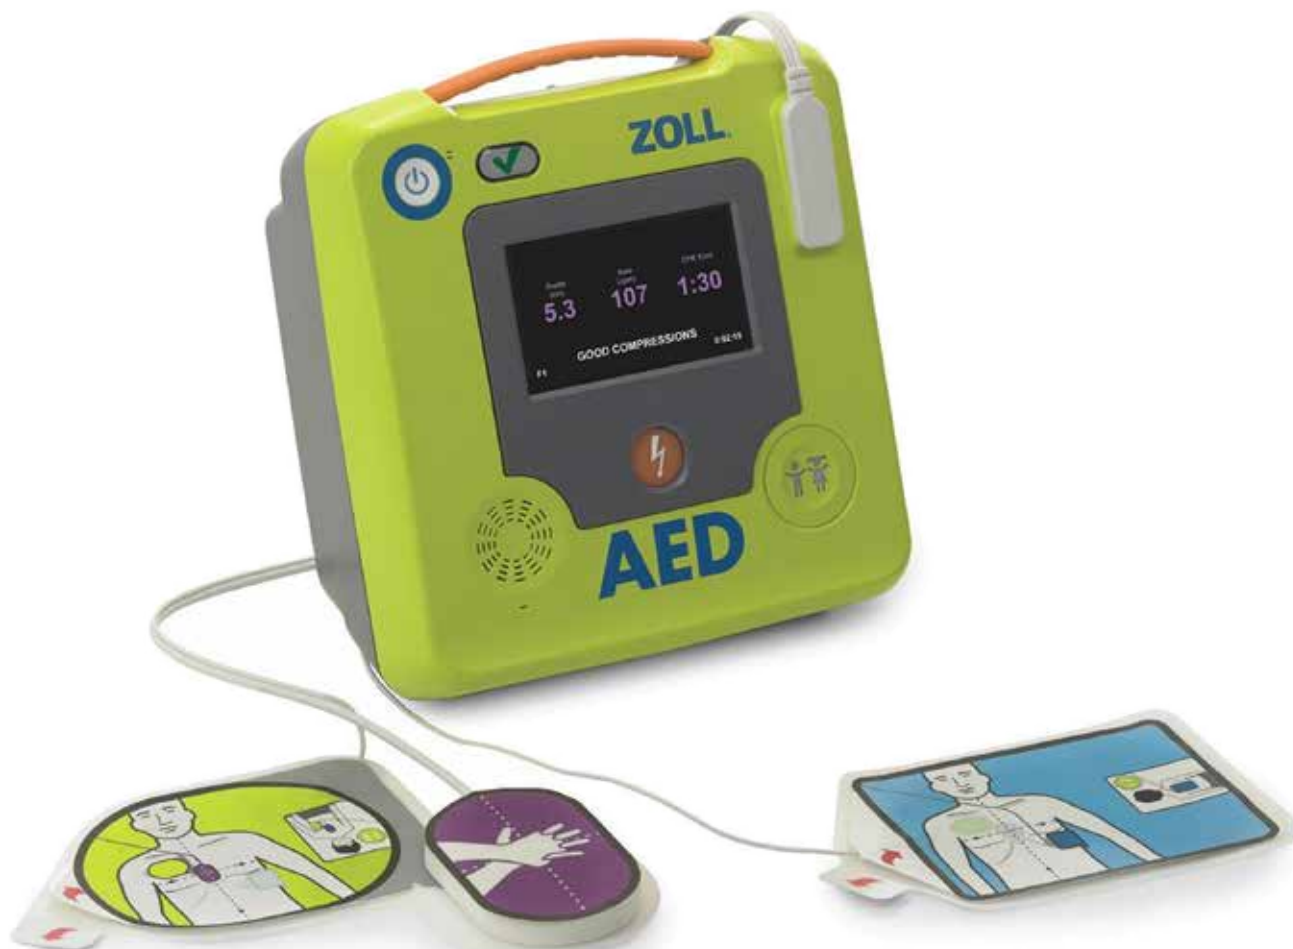

TrueCPR Feedback Device

- TrueCPR can provide critical, real-time CPR feedback, which provides assessment both during and after the event
- Compression depth and rate are displayed in real time on a highly visible dial
- A CPR metronome and ventilation prompt guide the rescuer to deliver compressions according to current guidelines
- TrueCPR is the only CPR feedback device that uses Triaxial Field Induction (TFI), a proprietary technology from Physio-Control
- During CPR, TFI uses three dimensional magnetic fields to pinpoint the distance between two objects - the chest pad and the back pad - to accurately measure chest compression depth and provide high
- Captures 180 minutes of rescue data, which can be reviewed post-event with Physio-Control's data review software
- Can be used with any AED, making it an ideal adjunct to your rescue kit

CODE	ITEM
RE/146	TrueCPR Feedback Device

Zoll AED3 Semi-Automatic External Defibrillator

- Designed and built upon years of usability research with both trained and untrained rescuers - easy to use
- Real CPR Help that can see your chest compressions during CPR to let you know when you are doing high-quality CPR
- High-resolution full-colour graphic images and text accompany audio prompts for easy understanding of what to do next
- Constant metronome at a rate of at least 100 compressions per minute to comply with the latest guidelines
- Universal CPR Uni-padz for push-button selection of child rescue using the child button
- Shock delivery - 8 seconds after stopping CPR (Semi-Automatic Defibrillator) and 13 seconds after stopping (Automatic Defibrillator)
- Dual orientation (upright or flat) for the best visibility in a rescue
- Scissors attached to CPR Uni-padz for easy removal of clothing
- Rescue accessory pack containing non-latex gloves, barrier mask, razor, paper towel and towelette
- Battery life 5 years
- No maintenance inspections required

Prestan Professional AED Trainer

- Provides quality, durability and affordability like no other trainer in the market
- Clear, confident voice instructions that provide easy-to-follow directions
- Preconfigured scenarios make training students easier
- Includes a scenario, volume control, and language button
- Pads can be used at least 25-30 times during CPR/AED classes
- Contains a pad testing system
- Pads are pre-connected
- Pads have an embedded 'switch' in the pad which senses that the AED Trainer pads are attached to the manikin torso
- The silicone base adhesive on the pads, coupled with the foam structure, ensure easy application & removal

XFT-D0009 Mini AED Trainer

- Designed to effectively train emergency responders in the use of an AED device
- Helps responders become familiar with an AED and allows them to demonstrate the basic skills necessary to use an AED in an emergency
- Adult and paediatric pads are included
- No high-voltage capabilities, ensuring safety during training
- Complies with the latest Guidelines
- Voice prompts in a choice of 16 languages
- Very small and convenient
- The device has voice broadcast and LED display functions (Work instructions, electrode pads direction, shock instructions, warning signs)
- The device has voice prompts and LED indication during the two minutes CPR pause time

CODE	ITEM
DF/721	XFT-D0009 Mini AED Trainer
DF/722	Spare Pads for XFT-D0009 Mini AED Trainer

XFT-120C+ AED Trainer

- Designed with a replaceable plug-in card allowing the device to be customized by uploading different language and scenario options
- When Guidelines are changed, customers only require a new plug-in card to update the scenarios
- A metronome is added to the flashing lights when the unit is counting out the 2 minutes for CPR
- Prompts 100 compressions per minute to help the trainers perform CPR properly
- Completely compliant with AHA new guidelines
- Pre-configured with 10 training scenarios that simulate realistic sudden cardiac arrest episodes
- DC interface allowing users the option of connecting to the mains adapter, (DV 4.5V, 300mA) or use batteries
- Audio out interfaces enables the connection of external speakers which is helpful for instructors during teaching
- Remote Control function
- Five pairs of pads are included in the package (Adult and Paediatric)
- Fully auto and Semi auto scenarios selectable

GreenUrban 'EcoPad' Public Access Defibrillator Cabinet

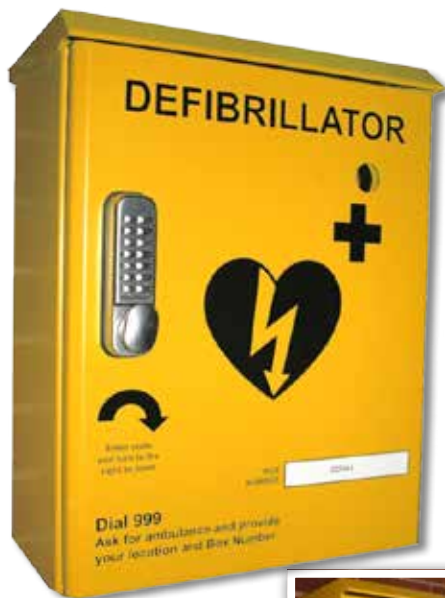

- Built to cope with the challenges of the British & Irish climates the EcoPad has all the features you would expect from a public access defibrillator cabinet, with the added benefits of thoughtful and sympathetic engineering design
- The EcoPad has been designed to be water resistant and to maintain a high enough temperature during winter months to ensure that the defibrillator and pads are protected in our wet & cold weather climate
- Can cope with outside temperatures as low as -15 degrees celsius and has actually been tested down to -20 with successful results
- Easily installed
- No electrician required - plugs into a standard wall socket
- Low voltage 'In Box', 12 volt transformer for low running cost
- Frost protection heater
- Status lights indicate if AED is present
- Internal light to aid night use
- Single hand entry
- Blank dedication panel
- Pre set locking codes as required
- 304 grade stainless steel outer shell

DF/621	GreenUrban EcoPad Public Access Defibrillator Cabinet
--------	-------------------------------------------------------

LifeBox AED Cabinet

- The LifeBox AED Cabinet is a highly visible, secure way to store publicly accessible defibrillators in any environment
- In the case of a heart attack, for every minute that passes without defibrillation, the chances of survival drop by 7-10% - after 10 minutes, survival is unlikely
- It is therefore not only critical to have defibrillators in areas where an ambulance could take more than 5 minutes to arrive, but also to ensure that they are highly visible and easy to access
- Having a defibrillator locked in a cupboard in a first aid room is of no use in a crisis
- The LifeBox has been developed to have various locking options to suit every environment
- Combination locks prevent the defibrillator being stolen, yet provide a quick way for 999 operators to grant access to the public when required
- Combination locks prevent the defibrillator being stolen, yet provide a quick way for 999 operators to grant access to the public when required
- Alternatively, a key lock with 'Break Glass' key safe can be provided
- Features a light and inspection window

DefibSafe 2 Defibrillator Wall Mounted Cabinet

- A successor to the original DefibSafe Aluminium outdoor cabinets, the DefibSafe 2 has been designed to provide even higher quality and security level at a lower c point.
- Durable polyethylene exterior cabinet for corrosion & impact resistance
- Polycarbonate access door for superior security - The same material used to construct riot shields
- High quality, corrosion resistant Stainless Steel mechanical lock with lifetime warranty
- Large handle for easy opening single handed entry
- IP66 rated, giving superior protection from the harshest weather conditions
- Unique location code with each cabinet, ensuring that help in emergency can be sent straight to the cabinet location and a 999 call operator can pin point the defibrillator location.
- LED Lighting for internal illumination making the cabinet visible at night
- Extremely economical to run (average £2 - £3 per year)
- Air circulation prevents condensation
- Tough and thermally efficient with a safety cut out feature
- 3 bolt fixing to wall ensures a stable fixing even on uneven surfaces
- Designed and manufactured in the UK
- Dimensions: 62.5 x 44 x 28.5cm

CODE	ITEM

LUCAS 2 Chest Compression System

The LUCAS Chest Compression System is designed to help improve outcomes of sudden cardiac arrest victims and improve operations for medical responders. Performing at least 100 compressions per minute with a depth of 5cm, LUCAS can be deployed quickly with minimal interruption to patient care.

The LUCAS 2 Chest Compression System is a safe and efficient external CPR tool that ensures CPR given is both standardised and effective in the event of cardiac arrest.

Providing a high level of quality CPR for all patients, this tool is vital in ensuring patients' survival, it allows you to call for assistance and focus more on the victim's medical needs, such as medication or defibrillation, without interrupting CPR.

It sets up quickly and performs the compressions at a continued rate and will not stop until no longer connected to a power supply. This is important as someone administering CPR can become exhausted and no longer able to perform manual compressions.

It can be run off a battery alone as well as by an electrical or car power outlet. Using new Lithium-ion Polymer battery technology, it takes around 4 hours to charge and runs for approximately 45 minutes. The battery can last for around 3 years, or 200 uses depending which comes first, before it will need to be replaced.

- 100 compressions per minute with a depth of 4-5 cm
- 50/50 duty cycle, for compression and decompression
- Complete chest recoil before next compression
- Can be applied within seconds
- Designed to minimize interruptions of manual CPR during application
- Frees up caregivers to focus on other life-saving tasks; ventilation, medication, defibrillation etc
- Small and lightweight Back Plate facilitates application in confined spaces
- Two compression modes; 30:2 mode or a continuous mode with ventilation alerts
- Allows access to patient's chest to place defibrillation pads
- Smart Restart function allows for an immediate resumption of compression after change of battery as it remembers the patient settings during 60 seconds
- Super lightweight at a tiny 0.6kg
- Dimensions: 13 x 8.5 x 5.5cm

LUCAS 2 Chest Compression System

Disposable Laryngoscope Blades & Handles

- High quality disposable blades with the same performance as reusable models
- Bright, focused light with fixed bulb - will not work loose
- Latex free
- Single use
- Stainless steel for maximum rigidity
- Fits any ISO7376/1 compliant conventional handle

MAD300 Mucosal Atomization Device

- Delivers intranasal medication in a fine mist which enhances absorption and improves bioavailability for fast and effective drug delivery
- Safe and Painless, no needle - no shot - no pain
- Atomized medications absorb directly into the brain and CSF via the olfactory mucosa (nose-brain pathway)
- Consistent, reliable spray every time

Bougie Tracheal Tube Introducers

- Our new range of single use Bougie Introducers has been designed to support successful intubation without compromising on patient safety
- Single use & sterile packed reduces risk of cross infection
- High gloss, low-friction outer surface improves tube glide over bougie
- Low point-of-pressure tip reduces risk of accidental trauma
- Available in 10CH & 15CH suitable for use with all tubes from 4mm (ID) to 10mm (ID)
- Also available in 5CH for use with 2.5mm (ID) tubes
- Extra tip graduations allow for improved laryngeal inlet entry & exit guidance
- Clear, highly visible outer packaging for ease of product identification in emergency situations
- Highly visible product colour for improved positioning
- Barium tip for improved X-Ray guidance

Tracheal Tube Guides

- Choice of reusable or single use with straight tips
- Recommended for use in cases where a tracheal tube exchange is necessary
- Available in Paediatric 5Ch & Adult 10Ch & 15Ch sizes
- Designed to aid changing of tracheal tubes

NasoSafe NP Airway - Sterile

NasoSafe is a new and innovative nasopharyngeal airway. The swivel safety grip eliminates the risk of the airway travelling down the nasal passage while providing the maximum comfort for the patient.

- NasoSafe grip protects the nasopharyngeal airway from loss in the nasal passage
- Rounded edge of the tip combined with the angle cut design helps to reduce the risk of injury during intubation
- Better tolerated by patients than oropharyngeal airways
Ideal when oral passage is not accessible
- Allows access for nasotracheal suctioning
- Swivel grip provides maximum comfort and safety
- Grip can be rotated to avoid blocking the free nostril
- Size colour coded to match suction catheter colour coding
- Made from medical grade PVC

CODE	ITEM

Portex Soft Seal Laryngeal Mask

- This single use Portex Soft Seal Laryngeal Mask comes in individual pre-sterilised packs. It provides many benefits to the 'medic' including elimination of the risk of cross infection between patients and allows easy access for flexible fibre optic guided placement of endotracheal tubes, smooth one-piece mould design including integral inflation line and features the exclusive Portex Soft Seal Cuff which reduces nitrous oxide diffusion.
- Better infection control - research has shown that even thoroughly cleaned reusable airway devices still contain residual protein deposits which have the potential for disease transmission*. Supplied in individually pre-sterilised packs.
- Ease of access - the Portex Soft Seal Laryngeal Mask is designed to avoid the risk of blockage without the need for obstructive epiglottis bars, allowing easy access for flexible fibre optic devices and flexible fibre optic guided placement of endotracheal tubes.
- A clear view - with the translucent tubing of the Portex Soft Seal Laryngeal Mask, condensation is clearly visible to confirm correct mask placement and blood, secretion or regurgitated gastric contents are easily visualised.
- Smooth one piece mould design - allows easy insertion and positioning. With no 'step' between tube and shoe and an integral inflation line, the Portex Soft Seal Laryngeal Mask is easy to insert and reduces the risk of damage to the line.
- Soft Seal cuff - the Portex Soft Seal Laryngeal Mask features the exclusive Soft Seal cuff, which is less permeable to nitrous oxide than that of reusable masks, reducing pressure rise and minimising potential trauma.

i-gel Single Use Supraglottic Airway

Features and benefits

i-gel gas a host of features that provide significant benefits to the patient and clinician.

• i-gel Natural Airway Management

- The i-gel is a truly unique airway device and represents the culmination of years of extensive research and development
- Everything about the i-gel has been designed to work in perfect unison with the anatomy; the i-gel design was inspired by the physiology of the perilaryngeal framework itself - airway management as nature might have intended
- The shape, softness and contours accurately mirror the perilaryngeal anatomy to create the perfect fit
- This innovative concept means that no cuff inflation is required.
- The i-gel works in harmony with the patient's anatomy so that compression and displacement trauma are significantly reduced or eliminated
- The cage packs are colour-coded for quick and easy size identification.

• The non-inflatable cuff

- i-gel gets its name from the soft gel-like material from which it is made. It is the innovative application of material that has enabled the development of a unique non-inflatable cuff. This key feature means insertion i-gel is easy, rapid and consistently reliable. Using i-gel; the simple, safe and rapid solution i-gel is incredibly easy to use. A proficient user can achieve insertion of the i-gel in less than 5 seconds. no inflatable cuff, i-gel provides a safe and rapid airway management solution

• Innovative packaging

- The i-gel supraglottic airway is supplied in an innovative colour coded polypropylene 'cage pack'. This unique packaging protects the i-gel in transit and ensures that it maintains its unique anatomical shape

i-gel Single Use Supraglottic O₂ Resus Pack

Four things in one pack, one less thing to think about.

In emergency medicine, you need equipment that's easy, rapid and reliable to use. The i-gel O₂ Resus Pack contains everything you need to prepare, insert and secure the i-gel O₂ quickly and efficiently: an i-gel O₂ supraglottic airway, a sachet of lubricant, airway support strap and a suction tube. The i-gel O₂ incorporates a supplementary oxygen port and an integral hook ring for securing of the airway support strap.

Includes

- i-gel O₂ Supraglottic Airway
- Sachet of lubricant – for quick and easy lubrication of the i-gel O₂ prior to insertion
- Airway support strap – to secure the i-gel O₂ in position
- 12 FG suction tube – for insertion through the gastric channel to empty fluid from the stomach

Veinlite EMS Pro Portable Vein Finder

The worlds best selling vein access device just got better, with the new integrated white exam light.

Veinlites unique C-shaped design stretches the skin for easy needle insertion, prevents veins rolling and results in fewer IV access failures. Using Veinlite saves time, avoids repeated needle sticks, decreases patient pain and anxiety and reduces wasted IV supplies.

- Clinically proven Veinlite technology
- NEW - Integrated exam light
- Robust design for use in the field
- Works on dark and light skin tones
- Uses any standard AA batteries
- Simple, single button operation
- 24 Bright Light Emitting Diodes (LEDs)
- Two LED colours optimized for vein imaging
- 12 Orange LEDs for superficial veins
- 4 Red LEDs for deeper veins, darker skin
- 8 White LEDs for examining
- Light shield and paediatric adapter
- Includes single use barrier covers
- Includes 2 AA batteries

EZ-IO Intraosseous Infusion System

- The EZ-IO Intraosseous Infusion System is a complete solution for immediate vascular access — whether you're facing difficult vascular access challenges or need immediate intraosseous access for critical situations and life-threatening emergencies
- EZ-IO provides the medical professional immediate vascular access to the central circulation within seconds, delivering medications, intravenous fluids and blood products to adult and paediatric patients alike
- In the pre-hospital environment, time is everything – and in many scenarios, peripheral IV access can be difficult or time-consuming, EZ-IO provides an ideal solution
- Can be used to quickly establish stable and secure vascular access in less than 10 seconds — for adults and children, awake or unconscious
- With a specially designed cutting IO needle and small power driver, the EZ-IO allows the clinician complete control — avoiding the use of force
- EZ-IO provides rapid, smooth entry into the bone's medullary cavity, creating an immediate conduit to the central circulation
- The EZ-IO Intraosseous Infusion System is the leading choice for intraosseous access across multiple health care settings
- Used by 90 percent of US advanced life support ambulances, over half of US Emergency Departments, and the US Military
- EZ to use, EZ to train and EZ to maintain, EZ-IO is the preferred choice of intraosseous access for medical professionals and the best method for gaining immediate vascular access

Combat Application Tourniquet (C-A-T)

- The Combat Application Tourniquet (C-A-T) is a true one-handed tourniquet that completely occludes arterial and venous blood flow of an extremity in the event of a traumatic wound with significant haemorrhage
- The C-A-T uses a windlass system with a free moving internal band to provide true circumferential pressure to the extremity. Once tightened and bleeding has stopped, the windlass is locked in place.
- A velcro strap is applied for further securing of the windlass during casualty evacuation
- Quickly controls life-threatening extremity bleeding
- Small and lightweight
- Completely occludes arterial blood flow in an extremity
- Fits a wide range of extremities
- Provides true circumferential pressure
- Cost effective
- Self adhering band
- Friction adaptor buckle
- One handed windlass system

CODE	ITEM
IN/921	Combat Application Tourniquet (C-A-T) - Black
IN/922	Combat Application Tourniquet (C-A-T) - Orange

Special Operations Forces Tactical Tourniquet (SOFTT)

- The SOFTT is applied the same to an arm or leg - unlike other tourniquets that require you to learn two methods of application and implement the proper method when under stress
- The SOFTT is constructed of quality, high strength materials
- The tourniquet handle is machined from a solid piece of aircraft aluminum and maintains its strength in the most extreme temperature
- The tri-rings are molded Acetyl, a high impact plastic that will also maintain its strength in extreme temperature
- Safety set screw prevents accidental release of pressure during tactical patient movement
- Dual locking rings provide a back up in the event of a broken ring
- The SOFTT can be easily repaired if it is damaged - 550 cord, boot laces or zip ties can be used to replace the tri-rings
- Proven to be 100% effective during US Army Institute of Surgical Research testing

CODE	ITEM
IN/923	Special Operations Forces Tactical Tourniquet - Black
IN/928	Special Operations Forces Tactical Tourniquet - Orange

Special Operations Forces Tactical Tourniquet (SOFTT-W) Wide

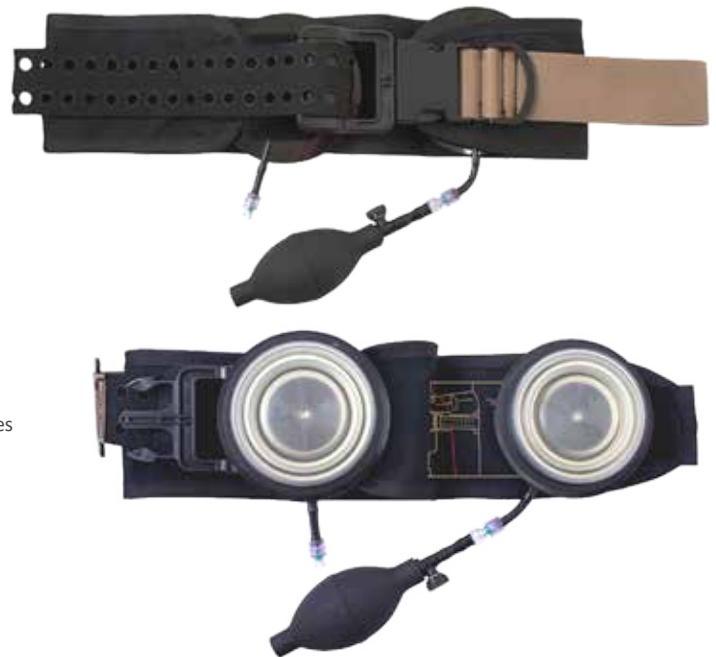

- The result of two years research of user feedback and laboratory study and builds on the success of the original SOFTT
- A true 1.5" tourniquet strap, providing a better compression pattern than most other tourniquets
- Compact, robust and easy to apply
- The SOFTT-W is easy to learn to use and is re-useable
- High-strength, light-weight components are used throughout; ensuring reliability in the most demanding of circumstances and on the largest of limbs
- Uses a high-strength aircraft aluminium windlass, virtually eliminating the risk of windlass failure
- No velcro anywhere, so the SOFTT-W can perform effectively when wet, muddy, sandy or frozen
- Quick-release, snap-lock buckle design, allowing rapid routing of the strap around trapped limbs without rethreading
- Weighs only 90g

CODE	ITEM
IN/923W	Special Operations Forces Tactical Tourniquet - Black

SAM Junctional Tourniquet

- The SAM Junctional Tourniquet for hemorrhage control is designed to control bleeding where tourniquets would not be effective, such as with IED/Blast injuries or high level amputations
- The SAM® Junctional Tourniquet offers a simple design
- It is compact, easy to use (only four steps), and quick to apply (typically under 25 seconds)
- The Target Compression Device (TCD) is placed at or near the injury site and pumped up until the bleeding stops
- Two TCDs can be used to occlude blood flow bilaterally if needed
- The rugged design ensures that the device stays firmly attached to the patient during transport
- Designed to exceed MIL-STD-810g requirements
- In addition, the SAM Junctional Tourniquet is the ONLY junctional hemorrhage device FDA approved to stabilize pelvic fractures. Recent studies indicate that IED-type injuries often have associated pelvic fractures
- The patented buckle provides the clinically correct force every time, taking the guesswork out of tightening
- This is vital in high stress environments where over-tightening or under-tightening could potentially be harmful
- For pelvic fractures

CODE	ITEM
IN/929A	SAM Junctional Tourniquet - 1 TCD
IN/929B	SAM Junctional Tourniquet - 2 TCDs

The AAT - Abdominal Aortic Tourniquet

- The Abdominal Aortic Tourniquet (AAT) is the first device to provide stable and complete occlusion of flow of blood to the lower extremities
- It has 510(k) approval from the FDA for difficult to control inguinal haemorrhage
- It is applied to the mid-abdomen, tightened and inflated and may remain on for up to an hour safely
- Initially developed for military applications, the AAT is now being implemented domestically
- When in operation, the device is wrapped around the patient's upper or lower torso and tightened using a windlass for stability
- It is then inflated using a wedge-shaped bladder that indicates when a sufficient pressure has been reached by displaying a green strip
- While originally designed to stop blood loss in the pelvis and upper legs by providing compression at the aortic bifurcation, it has also successfully been used around the upper body to stem a severe haemorrhage caused by a bullet wound

CODE	ITEM
IN/941	The AAT - Abdominal Aortic Tourniquet

SWAT-Tourniquet - Stretch, Wrap and Tuck Tourniquet

- A unique and multipurpose dressing that uses a non-latex elastic band that stretches around an extremity and tucks into itself for hours of effective pressure
- Its name provides a description for usage Stretch, Wrap, and Tuck while the graphics on the band indicate proper tourniquet pressure
- Allows a more rapid means to control extremity bleeding and allows application higher into the groin and axilla than other tourniquets
- Its ease of application is one of its greatest benefits; individuals can effectively apply it in seconds with little to no prior training
- It can also act as an occlusive bandage, a pressure dressing, and as an elastic bandage
- The band has been applied thousands of times and used in the sub-zero temps of Antarctica and boiled in water with no strength degradation

Prefilled Saline Flush Syringe

- Prefilled syringes, with their single-use, disposable format, together with the fact that they eliminate several of the procedures required prior to administering a formulation presented in a vial, are significantly quicker and more convenient. Ease of use, in addition to simply making them more convenient, means that prefilled syringes are safer
- Less preparation, fewer materials, easy storage and disposal
- Remove need for vials, ampoules and needles with a single product
- Available ready-to-use in 5ml and 10ml unit doses
- Simplify catheter maintenance procedures
- Isotonic Solution of 0.9%; osmolarity of 0.31 mOsmol/mL, pH 4.5-7.0
- Quantity discount available

CODE	ITEM

IN/919	SAM Chest Seal - With Valve - Single Dressing

Bolin Chest Seal

- Occlusive chest wound dressing for treating open pneumothorax and preventing tension pneumothorax that result from gunshots, stab wounds, or other penetrating chest trauma
- Failure-proof triple valve design of the BCS allows air and blood to escape while preventing the re-entry of either
- 6" rugged polyurethane disc structure of the BCS can cover a large area of any size chest trauma
- Uses adhesive strong enough to not only seal over hair and blood but also flexible enough to be removed and reapplied to the trauma site if required
- NSN:6510-01-549-0939

CODE	ITEM
IN/915	Bolin Chest Seal - Single

Asherman Chest Seal

- A unique & innovative open chest wound dressing
- Provides a sterile and disposable adhesive seal
- Circular design to aid conformability and cover the wound
- Particularly effective when applied to sucking chest wounds
- Extremely simple to apply with no invasive procedures
- Pressure sensitive adhesive to seal dressing in place
- Sterile dressing incorporating a gauze pad to clean and dry the wound
- One way valve allows air to escape but totally eliminates the intake of outside air
- Flutter valve reduces the risk of a tension pneumothorax
- NSN:6515-99-497-2148

CODE	ITEM
IN/092	Asherman Chest Seal - Single

Halo Chest Seal

- Ideal for the treatment of open pneumothorax, this seal also prevents the development of tension pneumothorax resulting from gunshots, stab wounds, or other chest injuries
- Specifically designed for treating injuries with excessive bleeding, heavy perspiration, or very wet and extreme environments
- Creates an occlusive seal around wound
- A highly-aggressive hydrogel enables the HALO Seal to conform and adhere to all contours of the body and also prevents further contamination of the injury
- Packaged in a two-pack for treatment of both entrance & exit wounds
- Non-vented design that is oval in shape
- Puncture-resistant packaging with long shelf-life
- Sterile

CODE	ITEM
IN/939	Halo Chest Seal

The iTClamp V2 Device

- Immediate, effective haemorrhage control
- Controls bleeding in the scalp, neck, extremities, axilla and groin in seconds without the need for continued direct pressure
- Seals the edges of a wound closed to stop bleeding until the wound can be sutured or surgically repaired
- Superior to wound packing in terms of patient survival survival time and total blood loss
- Applied in seconds with minimal pain to the patient the iTClamp is ideal for emergency medical personnel
- Sterile

For Doctor, Nurse & Paramedic badges, your certificate/pin number will be required

The Unvisor provides clear identification for emergency services and highly visible temporary marking for vehicles.

Used extensively by various emergency services worldwide including Police, Fire, Search and Rescue, Ambulances, Doctors, Paramedics, Nurses and First Responders. Unvisor's huge range of visors are perfect for marking any emergency vehicle that may be out of service or just out on test, also a great idea for unmarked police cars, CID officers or anyone who has to use their own car for working within an emergency or rescue service.

Unvisor

- Made to patented design
- Fits most vehicles
- Simply slides over existing vehicle's sun-visor
- No fixing brackets or sticking
- Hidden / removable when not in use
- Tested to International DIN standard for in-car items
- Recyclable, washable, UV stable, shatterproof, fireproof
- Printed with 3M retro-reflective letters
- Wide range of colours

ITEM
Unvisor - Standard
Unvisor - Made to your Specification

Illuminated LED Unvisor

- The Illuminated LED Unvisor is visor sign that clips to the passenger sun visor and identifies vehicles when needed, at incident scenes, crimes scenes and accidents, covert operations, on tests, out of service, when parking or in traffic, access to secure or controlled areas
- Featuring 90 super-bright white LED's, powered by a 9-12v cigarette lighter socket, this Illuminated LED Unvisor gives enhanced visibility when compared to the standard Unvisor
- Easily removed or hidden when not in use, by simply folding away the vehicles standard visor
- The LED Unvisor fits all standard vehicles
- The main wiring can be tucked away and the sign is easily disconnected from an adapter close to the sign, for easy removal when not needed
- It is recyclable, washable, UV stable, shatterproof and fireproof
- Heat and fade resistant under conditions of heat and sunlight
- Any lettering can be printed

The perfect protection accessory for law enforcement, ambulance staff and security personnel

Turtleskin fabric has the world's tightest weave which means it can be light, breathable and almost impenetrable at the same time.

Turtleskin has many varied uses, from puncture resistant protective clothing to more sophisticated body armour used by emergency personnel and the military. So diverse are its uses it was even used as part of the NASA's Mars landing vehicle to protect it on landing on the rough surface of Mars.

Turtleskin is a patented fabric using an 'Aramid fibre' that is woven more tightly than other materials. The result is a very thin, flexible, cut and puncture resistant material which helps protect against needle stick, metal shards and glass fragments. With a thickness of less than 3 sheets of paper, Turtleskin gloves offer a superior level of dexterity for environments where grip, precision and control are demanded.

For more information on our range of Turtleskin products including a demo video, please visit our website www.spservices.co.uk/turtleskin

Turtleskin WorkWear Plus Gloves

- The perfect hand protection for anywhere you may encounter a sharp
- Designed for tasks that require great grip, dexterity, tactile sensitivity and cut and puncture resistance

Tracerlite® TACTICAL FOOTWEAR

Tracerlite Tactical Footwear is now available in Europe.

Tracerlite has become the leading provider of duty footwear in Australia and New Zealand for Police, Prisons & EMS.

Tracerlite has a mission to build environmentally sustainable, lightweight performance footwear that combines function and fit. To prove our environmental credentials our footwear is one of only a very few specifically tested by the UK Shoe & Allied Trades Research Association (SATRA). Tracerlite Boots will not fail to satisfy the user.

Rigorous control of supply channels, manufacturing and Quality Assurance ensures that Tracerlite have entered the European market with quality footwear that is being used daily in harsh conditions with many 1000's of satisfied users and that are Tested and Certified to CEN ISO Standards.

Comfort for Emergency Personnel begins from the feet upwards

Ferno Pedi-Mate Child Restraint System

- The Ferno Pedi-mate Child Restraint System is safe, comfortable, versatile... and it fits a wide range of Ferno trolleys
- Safety is paramount when children are being transported... but the right harness system should offer you more than just this
- Your chosen system needs to support children of a relatively broad age and weight range, avoiding wasting money and storage space on multiple harnesses of varying shapes and sizes
- Restraints need to be secure but also comfortable, so the child doesn't feel restricted. Durability and hygiene are also important
- It's easy to use, comfortable and rolls up for easy storage – the ideal harness system to fit a wide range of Ferno trolleys
- Secure but uncomplicated – five-point harness system clips snugly in place with adjustable straps
- Quick and easy to use – restrains the child securely and comfortably
- Versatile – three fully adjustable restraint straps to hold children from 4.5kg to 18kg
- Safe and hygienic – made from non-toxic, easy-clean vinyl
- Storage – a bag is supplied for the Pedi-Mate strapping system for safe storage

CODE	ITEM

- Donway's new BioStrap Restraints will safely secure a patient to a spineboard, scoop or stretcher trolley
- Polyester straps specially coated with urethane to give you an easy to clean, MRSA resistant surface
- Coating prevents fibres absorbing contaminating fluids
- Extremely tough yet comfortable for patients
- No exposed fibres anywhere to absorb blood or other body fluids that frequently contaminate other patient restraints
- Quick and easy to decontaminate - can be back in service promptly
- Puncture resistant coating
- Supplied in a bright neon orange
- Abrasion resistant
- Stays flexible in all climates
- Donway BioStraps give you peace of mind that your patients and staff are secure and protected from cross infection

Pro-Lite XT Spineboard

- The highest quality backboard available to the market
- Extra reinforcement inside handgrips for extra strength
- 1000 lb. single patient weight capacity
- Seamless design prevents fluids from entering and eliminates risk of cross-contamination
- Two boards can be nested together in less than 4' of space with the head immobiliser attached
- Supplied with speedclip pins
- Weight: 12.5lbs, Dimensions: 182 x 40 x 5.7cm
- 100% guarantee of workmanship under normal usage, guaranteed for life
- Guaranteed 100% x-ray translucent
- Guaranteed not to warp with minimal deflection under maximum load
- Stiffener system in handgrips make the XT the strongest completely translucent spineboard available

AlLEvac Mantis Tri-Fold Backboard

- The Mantis Tri-fold Evacuation Board represents the ultimate in simplicity and durability
- It is ideal for vehicle extraction because of its compact size and rapid employment - it takes just seconds to fold out and make ready for use
- The Mantis is made of light weight aluminum and has zero risk of fire hazards, cracking, warping and gouging that's common with plastic and composite boards in tactical and vehicle operations
- The Mantis has recently passed operational testing by U.S. Special Operations Command (SOCOM) and is the official backboard of record integrated into the U.S. Department of Defense , Tactical Combat Casualty Care (TCCC) and Casualty Evacuation (CASEVAC) sets
- Dimensions: 183 x 40cm unfolded, 63 x 40cm folded
- Weighs 5.8kg
- Max Load: 227kg

CODE	ITEM
ST/075	AlLEvac Mantis Tri-Fold Backboard - Black

Ultra Spac-Sav Folding Spineboard

- Compatible with all standard head immobilisers
- Folds neatly so it takes up half the space of standard backboards
- Constructed with our exclusive stainless steel mechanical pivot and internal aluminium runners
- Durable HDPE shell does not reflect extreme temperatures ensuring superior patient comfort over metal folding stretchers
- Great for use in Paramedic Response Vehicles, 4x4s, or any other location where storage space is limited
- Subtle surface texture prevents slippage but is easy to clean and disinfect
- Twelve oversized hand-holds will accommodate gloved hands
- Dimensions: 183 x 40cm unfolded, 91 x 40cm folded
- Weighs 9kg, Max Load: 226kg

CODE	ITEM

Paraguard Excel Rescue Stretcher

- Designed for a variety of rescues, the Paraguard Excel is a compact and versatile articulating rescue stretcher. It is ideal for search and rescue operations and weighs just 16kg and can be used to rescue casualties from building collapse, industrial incidents or confined spaces. The Paraguard Excel has been developed from the popular Paraguard MKIII to provide a superior rescue stretcher.
- Compact, quick to apply and versatile
- Ideal for collapsed buildings, industrial or confined space rescue, particularly useful for high building and helicopter rescue
- Quality synthetic material, stainless steel and aluminium alloys, make the Paraguard impervious to oil, water, grease and other petroleum products
- Non-perishable and corrosive resistant
- When moving in awkward spaces the unique construction allows the centre of the Paraguard to unlock and bend
- For fast deployment new speed links enable the stretcher to quickly unfold when removed from storage
- Straps secure the chest, arms, thighs and lower legs. The head is held in place by a 3 point, non-slip forehead strap. A figure of eight strap supports the feet
- Comes with a bag for simple storage and ease of transport
- Dimensions: Length 183cm
Width 25cm
- Maximum Load: 136kg

Donway Manual Handling & Lifting Kit including Banana Board

The Donway Manual Handling & Lifting kit is the ideal solution for providing safe and effective patient handling. Commonly used by NHS and Private Ambulance Services as well as Falls and Crisis Response Teams.

The kit consists of:

Transfer Turntable (Load limit 115 Kg)

- Strong but lightweight Transfer Turntable
- Full 360 degree turning circle and a gripped, anti slip, upper surface for added user safety & security.
- An invaluable aid for a carer or relative, providing a smooth, easy and constant rotation when transferring a user to and from a bed, chair, commode or car etc. without the need to move their feet and legs.

Transfer Lifting Belts (Small, Medium & Large)

- Designed to assist the person getting out of their wheelchair, bed, chair or transferring from short distances.
- Four webbed handle grips for additional safety when transferring.
- Belts can be adjusted and buckled around the person's waist enabling the carer to reach the webbed handle.
 - Small Transfer Belt - 68 x 94cm
 - Medium Transfer Belt - 85 x 112cm
 - Large Transfer Belt - 90 x 119cm

Banana Board (Load limit: 200 Kg)

- A patient transfer board designed for patient movement when seated
- Low friction, sliding surface for swift and easy movement
- Curved shape, suitable for lateral transfers either unassisted or with the help of others

Tubular Glide Sheets (Medium & Large)

- A useful aid to carry out tasks such as repositioning patients in bed
- Helps caregivers to perform their jobs with greater comfort and safety, preventing strain injuries due to low friction.
- Washable and reusable
 - 2 x Tubular Glide Sheet - 200 (H) x 72cm (W)
 - 1 x Tubular Glide Sheet - 70 (H) x 72cm (W)

Carry Case

- Durable carry case with multiple internal sections
- Neatly secures equipment safely until required

Telford Traction Device

- Small and compact enough to fit in a First Aid kit yet adjusts to treat both adult and paediatric patients
- Lightweight and very effective
- The support pole can be extended in the same manner as a tent pole, just add or remove sections to get the best fit
- Eliminates the need to roll the patient or raise the leg during application
- Does not use an Ischial bar - no pressure problems
- Application variations allow you to work around the problem of hip and groin trauma situations
- Comes with a convenient storage pouch
- Colour Coded Straps
- Easy to follow instructions
- Adjusts for adult or paediatric use
- Weighs less than 560g

FareTec CT-6 Leg Traction Splint

- Designed for Pre Hospital Care and Patient Transport, specifically in combat scenarios
- It is primarily used on patients with mid-line femur fractures
- Helps relieve patient pain and prevents further damage to surrounding muscle and tissue while reducing the risk of death caused from severed arteries
- Made of carbon tubing which snaps together via an internal bungee
- A Cobra buckle secures the Ischial strap to the upper leg and groin
- These buckles prevent accidental releases and are commonly used by US military forces
- Traction is achieved with a 4 to1 purchase system using a small line to apply tension
- A very precise and delicate form or traction that is also powerful enough to be effective on extra large adults
- Extremely compact, light and strong
- Light - Unit weighs only 500g
- Unit fits in small synch bag, 28 x 10 x 7.5cm
- Includes Molle compatible bag
- Strong carbon fiber poles and injection molded plastics
- One unit fits both adult and paediatric patients

SP/067	FareTec CT-EMS Leg Traction Splint - Orange

Casualty Securing Straps

- Simple and easy to use - no knots or ties
- Multi Purpose - use as Bandages/Slings/Splints
- Inexpensive
- Strong, durable and re-usable
- Cost Effective - Replaces less efficient & consumable First Aid Equipment
- Minimal Training Needed - Reducing training cost and lost man hours
- Efficacy in application and treatment
- Quick and Easy for Self Application - Ideal for people alone in remote areas
- Can be lengthened - Simply join together along the full length of the fastening
- Broaden by simply placing side by side
- Lightweight and Compact - for carrying and storing
- Simply part and re-fasten for instant adjustability

Sager Traction Splint

- Fast, easy, fail-safe traction device
- Sager Emergency Traction Splints apply countertraction against the ischial tuberosity medial to the shaft of the femur in a manner consistent with the original Thomas Full and Half Ring Splints
- Uses the same manner of traction and countertraction applied to patients in operating room theatres undergoing surgical reductions and repair
- As with surgical procedures, Sager's application of traction avoids point pressure on the sciatic nerve and related vascular structures — in the critical proximal third of a femoral fracture
- This same feature makes the Sager indicated for treatment in 93% of all femoral fractures!
- Provides alignment, stability and pain relief
- Engineered for first responder treatment
- Allows traction to be applied to a single leg or both legs together

CODE	ITEM
SP/026	Sager Traction Splint - Adult
SP/027	Sager Traction Splint - Child

Slishman Traction Splint

- Developed to overcome many of the design limitations of conventional traction splints
- The innovative STS design has the traction mechanism positioned at the patients hip
- Femur traction is applied through the extension of the pole segments creating a pushing force on the ankle strap instead of pulling distally from the foot
- One size for both adults and paediatrics
- Anatomically contained from the patients hip to ankle and does not extend outside backboards, litters, and stretchers
- Rapid patient application with no poles or mechanisms to set up
- Lightweight - only 590g
- Radiolucent
- NSN: 6515-32-083-5266

SAM Pelvic Sling II

For stabilisation of pelvic fractures with the correct force

**CALL 01952 288999
FOR A FREE NO
OBLIGATION DEMONSTRATION**

**IMPROVED
ONE PIECE DESIGN
APPLIES IN
3 EASY STEPS**

The SAM Sling™ effectively reduces and stabilizes unstable pelvic fractures. It can be quickly and safely applied on the scene, before transport or in an emergency department.

The SAM Sling™ is a reusable, non-invasive, easy to use device, which can be applied by paramedics at the accident scene to individuals who have, or are suspected of having a pelvic ring or lateral pelvic fracture.

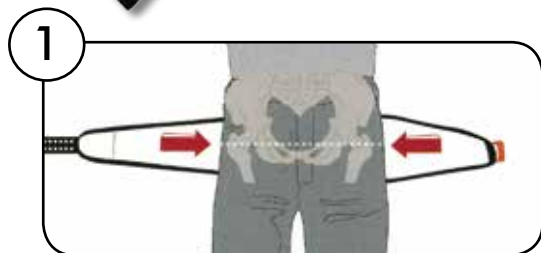

The SAM Sling™ is the first and only pelvic belt or binder to contain a buckle programmed to engage when the correct, safe amount of constrictive pressure is applied. This protects the patient from further injury and allows for safe application on scene by EMS personnel.

Pelvic-ring fractures are associated with a high mortality rate of up to 25%, mainly due to internal bleeding. The recommended method of dealing with a suspected open book pelvic-ring fracture is circumferential compression of the pelvis with a sheet or belt. This method (performed correctly) will greatly stabilise an open book pelvic fracture and therefore constitutes an effective means to control a life threatening haemorrhage.

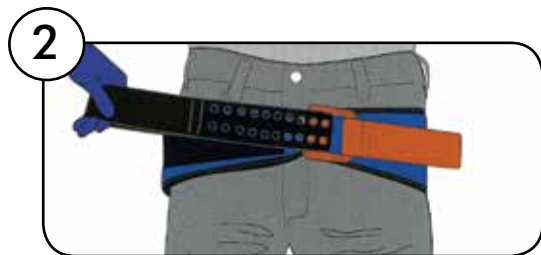

Research showed the unique SAM Sling™ Belt was highly effective in reducing and stabilizing unstable open book pelvic fractures. The SAM Sling™ is first placed under the buttock region at the level of the greater trochanters and then circumferentially tightened by pulling in opposite directions on the anterior handles. An innovative Buckle provides force and audible feedback when the circumferential pull-force has reached 150N (33lbs), at which point the belt is fastened to maintain optimal reduction and stabilization.

The Sam Sling™ is radiolucent and padded for comfort. The anterior section of this device is sufficiently narrow to allow for examination, catheterisation and access to the femoral vessels. The Sam Sling is reusable and can be cleaned with common detergents or anti-microbial solutions.

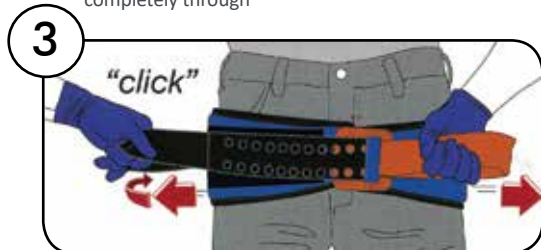

CODE	ITEM
SP/101S	SAM Sling Pelvic Sling II - X Small - 69-119cm
SP/101M	SAM Sling Pelvic Sling II - Standard - 81-127cm
SP/101L	SAM Sling Pelvic Sling II - X Large - 91-152cm

1 Remove objects from patient's pocket or pelvic area. Place SAM Pelvic Sling II white side up beneath patient at level of trochanters (hips).

2 Place BLACK STRAP through buckle and pull completely through

3 Hold ORANGE STRAP and pull BLACK STRAP in opposite direction until you hear and feel the buckle click. Maintain tension and immediately press BLACK STRAP onto surface of SAM Pelvic Sling II to secure

The SAM Sling™ has been researched and clinically proven to be effective on a range of subjects weighing 132 - 229 lbs. (60 - 104 kgs). It is not recommended for children.

SAM SPLINT

Acclaimed by emergency care providers and outdoor activity centres worldwide, the SAM® SPLINT is based on a universally recognised engineering principle: curves are strong.

Built from a thin core of aluminium alloy, sandwiched between two layers of closed-cell foam the SAM® SPLINT is extremely mouldable, and soft enough to cut with ordinary household scissors. Yet when bent into any of three simple curves, it becomes extremely strong and supportive for any fractured or injured limb.

With the proper choice of curves almost any bone in the body can be splinted. It's even possible to use the SAM® SPLINT to create an emergency cervical collar for neck injuries.

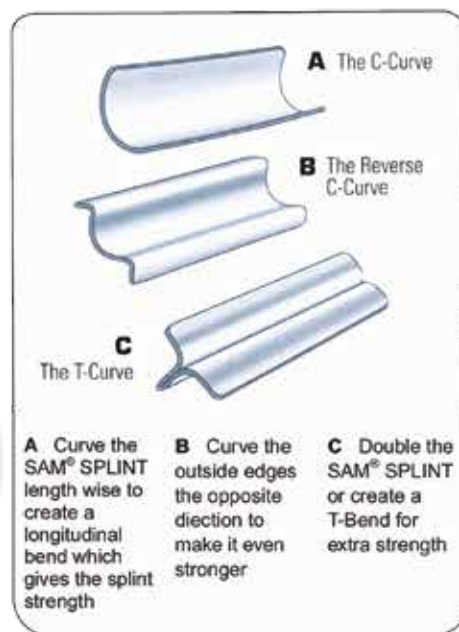

Upper Extremities & Neck Splints

Finger Splint, Thumb Splint, Short Arm Wrist Splint, Ulnar Gutter Splint, Double layer Wrist Splint, Sugar Tong Splint, T-Beam Wrist Splint, Dislocated Elbow Splint, Upper Arm Splint, Adjustable Collar Splint

Lower Extremities Splints

Ankle Stirrup Splint, Figure 8 Splint, Combination Ankle & Figure 8 Splint, Single Long Leg Splint, Double Long Leg Splint, Knee Immobilizer Splint

Mediwrap® is an innovative textile made into single use products with a comfortable, soft inner lining and an insulating, windproof and waterproof outer layer.

Designed to arrest hypothermia and stabilise patient temperature, it is able to absorb in excess of ten times its own weight of body fluids whilst keeping the patient warm and dry. The material also acts as a total barrier to bacteria, protecting paramedics from cross infection caused by previously used bedding.

Yaktrax Walker Ice Traction Device

- Yaktrax Walker ice grips in Black
- The most popular ice grips from Yaktrax
- Lightweight and comfortable to wear
- Easy to put on and take off when entering buildings or vehicles
- Yaktax Walkers are ideal when you have no choice other than to walk on icy pavements
- Yaktrax ice grips are the ideal way to reduce the risk of slips and falls on packed snow and ice in the urban environment
- Made out of an injection moulded thermal plastic elastomer designed for easy on and off
- Extremely light weight, between 45g and 95g depending on size
- The 1.2mm steel coils are protected against rusting and hand-wound to give you 360 degrees of traction on ice and snow
- The steel coils include 70% recycled material, making them eco-friendly
- Yaktrax Walker ice grips can be worn in temperatures as low as -41 degrees fahrenheit
- The outer band conforms to the length and width of your boot or shoe
- The high strength horizontal coils provide forward and backward stability, the vertical coil pattern provides side-to-side stability

FatIvan Door Chock

- The FatIvan door chock allows you to chock open any hinged door in seconds. This unique tool will work in the top, middle or bottom hinges so there is no messing around, just insert it in the hinge closest to you.
- Created to aid Emergency Service personnel who are tired of carrying wedges that rarely work or having bulky pieces of metal hanging out of their pockets and ultimately ruining their uniforms - No longer will they have to endure doors closing behind them or getting their hose lines pinched under doors
- Although this was primarily designed for emergency service situations the FatIvan has a host of applications where a door needs to be chocked, from removal firms to undertakers, the FatIvan is a must have tool
- Allows ambulance crew to easily hold a door open for quick stretcher or carry chair transit
- One-handed operation
- Opens quickly for insertion
- Never slips off a hinge, guaranteed
- Works on any door hinge
- Fold up and fits in a pocket when not in use
- Corrosion resistant plastic and zinc plated steel
- One handed insertion
- Folds up for easy storage
- Will not tear your uniform or equipment
- Compact and lightweight
- Dimensions: 10 x 5 x 2.5cm
- Weight: 142gm
- Quantity discount available

- LED Lenser the world's leading brand of technologically advanced LED lighting products, uses only the most powerful LEDs, patented reflector systems and highest quality components to make the brightest, most energy efficient LED lights available.
- View the whole Lenser range at
- www.spservices.co.uk/lenser

WHY LED?

Better Illumination
White not Yellow Light

Incredible Energy Efficiency
Comparing energy use over 200 hours of service, incandescent bulbs can use up to 80 batteries and 17 bulbs compared to 8 batteries and 1 bulb when using LED Lenser

No Filament to Break
A far tougher solution.

Lasts Longer - More Cost Effective
Incandescent bulbs can last up to 1,000 hours, LED up to 100,000 hours

LED Lenser H7R.2 Head Lamp - Rechargeable

RECHARGEABLE

- Advanced Focus System: Spot to Flood Beam focusing
- Tilttable lamp head – direct light where you want it
- Dimming function – set appropriate lighting strength and avoid dazzle
- Optimised weight/balance ratio: easier to wear
- Adjustable straps: adds to wearing comfort
- Belt pouch for storage when not in use
- Weight: 164g

LED LENSER Technology Highlights

- Advanced Focus System**
 Combines a reflector and lens to allow for stageless transition from a circular flood beam to a sharply focused spot beam. Black spots or dark rings common in inferior Torches are eliminated by this unique technology.
- Dynamic Switch**
 The ability to adjust brightness at Lightning speed, with one hand, within milliseconds.
- Smart Light Technology**
 The M series features an intelligent microprocessor, enables control over the torches energy consumption, lighting programs and light functions.
- Speed Focus**
 Speed Focus allows smooth, single handed focusing transition. Flood to spot beam and back again in an instant without the need for two handed twist head focusing.
- Fast Lock**
 Allows locking in position of the Speed Focus capability.
- Gold Plated Contacts**
 Lenser gold plated contacts maximise power transfer

LED Lenser P3 Torch

- Spot to Flood Beam single handed speed focusing
- Robust, yet lightweight, aircraft grade aluminium
- Splash and dust proof design – protects better
- Handy pocket clip – secures torch
- Superior rear tail cap switch – lasts longer

MAG-LITE®

Mag-Lite C & D Size Torches

The Mag-Lite's distinctive torch design makes it practical for work or play. Whether in professional, rescue, sporting, home or automotive applications the diverse needs of industrial and personal use are uniquely met by the Mag-Lite commitment to inspired performance.

When conditions are less than perfect a torch shouldn't be. That's why Mag-Lite torches are really in their element in rain, snow, mud and even moisture. Which means you can take them camping, hiking, skiing, sailing, even to the beach without worry.

- High-intensity adjustable light beam (Spot to Flood)
- Rugged, machined aluminum construction with knurled design
- Anodised inside and outside for corrosion resistance and durability
- Water and shock resistant
- Spare lamp safely secured inside the tailcap

ANSI Icon Reference

	Light Output Light Output is the total luminous flux. Light output in this standard is expressed in units of Lumens.
	Run Time Run Time is defined as the duration of time from the initial light output value using fresh batteries, until the light output reaches 10% of the initial value.
	Beam Distance Beam distance is defined as the distance from the device at which the light beam is 0.25 lux
	Peak Beam Intensity Peak beam intensity is the maximum luminous intensity represented in candela
	Impact Resistance Impact resistance is the degree to which a device resists damage from dropping on a solid surface.
	Water Resistant Water splashed against the device from any direction shall have no harmful effects.

Mag-Lite ML125 Rechargeable LED Torch

- Fully rechargeable LED torch
- Dual power option : NiMH battery (supplied) or 3 x C cell alkaline batteries
- 5 available functions: Full power (100%),
- Power Save (25%), Strobe (12 pulses/second),
- SOS (Intl Morse Code), Momentary on/off
- Rugged, aircraft aluminium construction
- Spot to flood powerful LED beam
- Individually serial numbered
- Recessed, pushbutton, 3-position
- Self-cleaning switch
- Water & Shock resistant
- Anodised inside and outside for corrosion resistance and durability

Hot Meal Kits

The Hot Meal Kit has been specially developed to allow you to eat on the go or when there are no cooking facilities available.

- This is simple and effective to use.
- Place the sealed food pouch in with the Flameless Ration Heater, add a small amount of water and then watch the chemical reaction heat the food in minutes
- We've also included a spoon and a wet wipe to complete the kit
- Ideal for using on night shifts, remote locations, on expeditions, music festivals or any emergency situation

Is SP Part of your MAJAX Plan?

SP Services is an international supplier of medical, first aid, ambulance, paramedic and emergency rescue equipment. We pride ourselves on our high level of service and this has not gone unnoticed by many of the major disaster relief organisations including the United Nations and the World Health Organisation. This has resulted in SP products being put to good use in the following areas:

- Earthquake disaster zones**
- Avian/Swine Flu outbreaks**
- Medical treatment of refugees**
- Treatment of landmine victims**
- Terrorist attacks**

- Here are just some of the reasons why SP are so successful and continue growing in both size and stature.
- SP offer a 24 hour/7 day a week/365 days a year emergency hotline
- SP has 36,000 ft2 warehousing facilities with over £1,000,000 worth of stock and over 10,000 products
- SP has 24 Hour ordering facilities via fax and internet
- SP offers professional advice from experienced paramedic and first aid professionals
- SP will allocate an experienced account manager to oversee your order from placement to delivery
- SP offers low cost overnight delivery throughout mainland Britain - year round
- SP can deliver same day within mainland Britain
- SP can deliver worldwide
- SP accept payment by all major credit cards and will open accounts for established organisations

 **07710 920 775**

Cruciform Casualty Triage System

- Colour coded module - Red, Yellow, Green and White pages
- Numbered/bar coded stickers for ambulance/police/fire & rescue service, hospital records, bag of possessions
- Numbered/bar coded wristband, CBRN-E “flags” and numbered/bar code victim location tag for police
- Casualty details module (with overlay page for police) - both numbered
- Trauma score module (sequential scoring + triage audit) - numbered
- Additional details module (ad hoc information) - numbered
- Pages are not laminated which ensures that a permanent record is produced - this is especially important in case there is a possibility of future litigation
- Boxes of 10 and 25 cards include triage sieve/casualty estimate and pen
- Full instructions are included
- Also available in other languages, call for details

Ambu IV Training Arm

TR/751

- Designed with absolute realism in mind
- Life-like latex skin, 3 veins and 1 artery
- Realistic wrist rotation, extension and shoulder pivot
- Complete with infusion stand, dye and talcum powder

CODE	ITEM
TR/751	Ambu IV Training Arm - With Spare Veins & Skin
TR/752	Replacment Vein for Ambu IV Arm
TR/753	Replacement Skin for Ambu IV Arm
TR/754	Red Dye Concentrate for Ambu IV Arm

Ambu Intubation Trainer Head

TR/741

- Realistic mouth, nostrils, teeth, tongue, pharynx, larynx, epiglottis, vocal chords, trachea, oesophagus and lungs
- Anatomically correct construction permits jaw thrust
- Open left side allows control of the trainee's technique
- Ideal for practising clearing of oral and pharyngeal cavities and trachea by suction
- Stomach alarm warns of improper tube placement
- Teeth alarm warns of excessive pressure
- Can be used with virtually all oral and nasal intubation devices
- Two convenient drawers for accessories
- Lightweight aluminium base and removable skin

CODE	ITEM
TR/741	Ambu Intubation Trainer Head

Ambu Airway Man Trainer

Wireless Connection

TR/745

- Advanced instruction and training manikin for the simulation of realistic and correct anatomical and physiological conditions during cardiopulmonary resuscitation and resuscitator ventilation
- Can be used for insertion of different airway management devices
- Provides an exceptionally lifelike representation of the human anatomy, particularly of those features important to training in modern resuscitation techniques
- Built-in instrumentation shows the effectiveness of the resuscitation including results achieved for insufflation volume and depth of external chest compression and indicates any stomach inflation and incorrect hand positioning
- Does not need cables or wires, which means it can be placed away from computers and power supplies providing a great amount of freedom while training and because there are no wires or cables lying around it gives an even more realistic scenario

CODE	ITEM
TR/745	Ambu Airway Man Trainer

Ambu Cardiac Care Trainer / Manikin

Wireless Connection

TR/771

- An advanced instruction and training manikin that has been designed for training Advanced Life Support in ACLS (Advanced Cardiac Life Support) algorithms and teamwork, either indoors or on location in field situations
- Wireless PC connection is possible allowing the Ambu CPR Software Kit to be connected
- Modular expandability means you can invest gradually, updating the system as you go
- Compatible with Combitube, Laryngeal Mask Airway oropharangeal airways and traditional E.T. tubes
- The ECG box simulates as many as 26 rhythms and 2 artefacts giving a wide range of ECG options
- The ECG Box has two optional power sources: an internal battery pack, or an external 9V adapter

CODE	ITEM
TR/771	Ambu Cardiac Care Trainer / Manikin

Ambu Man - Model WI - Torso

Wireless Connection

- New wireless connectivity
- The AmbuMan W (Wireless) does not need cables and wires, which means it can be placed in realistic surroundings away from computers and power supplies
- AmbuMan W models are equipped with a mechanical monitoring instrument as well as digital sensors showing effectiveness of the resuscitation
- The AmbuMan I (Instrument) models are equipped with a
- mechanical monitoring instrument showing effectiveness of the
- resuscitation, including results achieved for ventilation volume
- and depth of external chest compression
- Pulse is activated in the neck by chest compression and can
- be activated manually by instructor
- Adjustable neck stiffness and realistic exhalation
- Adjustable chest stiffness allowing students to train on different body builds
- Ambu hygenic system protects against cross infection
- Complete with carrying bag/training mat

Simulaids STAT Man Manikin

- Simulaids introduces the STAT Man. The new 6'1" body demonstrates a giant step forward in manikin design. Joint range of motion is near human and pinching in jointed areas is a lost art. Rib cage motion mimics lifelike respirations. Multiple pulse points demonstrate blood pressure variations.
- Product includes packages of replacement parts, sweat suit with logo, accessories and comes in a hard storage case with wheels.
- PDA STAT manikin is intended to be used for training of emergency medical personnel. All levels of EMS training can be administered to this manikin, including: physicians, nurses, ALS and BLS.
- STAT Manikin dimensions
- Size: 185.4 x 86.4 x 30.5cm

Skill areas:

- Pulses
- Advanced IV arm
- CPR

- Intubation

- Multiple injection sites
- 4-lead monitoring
- Chest tubes

Challenges:

- 12 pulse points
- Oral and naso-intubation
- Tongue swells
- Laryngospasm
- Cricothyrotomy
- Stomach distention

- IV arm therapy
- Defibrillation
- Arrhythmia training
- Bilateral pneumothorax relief
- Bilateral chest tube placement with simulated fluid discharge

TruCorp Truman Trauma System Manikin

The TruCorp Truman Trauma System, designed for teaching medical professionals the necessary skills for dealing with a range of life threatening trauma situations

An anatomically correct simulated human torso together with the renowned AirSim head for training the full range of airway management and resuscitation skills

The Truman Trauma System features replaceable tissues which help provide each trainee a lifelike and unique surgical experience.

Ideal for training in

- Chest tube insertion: recognition of correct position, surgical incision, blunt dissection through chest wall, perforation of pleura and finger sweep
- Needle Decompression of tension pneumothorax
- Cardio Pulmonary Resuscitation (CPR)
- Airway Management Skills
- Identification of tracheal deviation and jugular vein distension which are warning signs attributed to tension pneumothorax

CODE	ITEM
TR/500	TruCorp Truman Trauma System Manikin

TruCorp AirSim Multi Manikin

- Uniquely constructed to allow realistic feedback during airway management procedures and provides true, anatomically correct and visually accurate internal features
- The addition of a nasal passage and chin facilitates training in nasal intubation procedures as well as bag and mask ventilation techniques

CODE	ITEM
TR/502	TruCorp AirSim Multi Manikin

TruCorp Airsim Advance Manikin

- The AirSim Advance features the uniquely constructed AirSim airway, designed to provide true, anatomically correct and visually accurate internal features to allow for airway management techniques
- The addition of a "real-feel" skin covering provides a more realistic bag mask ventilation training, allowing for accurate articulation
- The AirSim airway providing realistic feedback during airway management procedures
- Real feel' skin covering for added realism
- A nasal passage which has been developed in a manner similar to the AirSim airway. Providing an anatomically correct nasal cavity, important landmarks such as the turbinates are clearly defined
- An inflatable tongue with real-life size and texture

CODE	ITEM
TR/504	TruCorp AirSim Advance Manikin

TruCorp AirSim Baby Manikin

- The TruCorp AirSim Baby, based on a 0-6 month old provides a realistic and anatomically correct paediatric manikin for airway management training
- Realistic feedback during airway management procedures including bag/mask ventilation, supraglottic airway insertion, both naso and orotracheal intubation
- Realistic external and internal anatomical features allow for easy and successful demonstration of all paediatric videolaryngoscopes

CODE	ITEM
TR/508	TruCorp AirSim Baby Manikin

TruCorp Advance Combo Manikin

- Wrap around replaceable neck skin which facilitates up to 20 incisions thus improving efficiency
- Optional subcutaneous fat tissue to demonstrate more difficult tracheostomy and cricothyroidotomy procedures
- Realistic features which include; palpable cricoid landmarks, laryngeal cartilages and tracheal rings to provide positive user feedback and easy identification of the sternal notch
- The 'AirSim' airway which provides realistic feedback during airway management procedures
- A nasal passage which has been developed in a manner similar to the AirSim airway. Providing an anatomically correct nasal cavity, important landmarks such as the turbinates are clearly defined
- An inflatable tongue with real-life size and texture
- 'Real feel' skin covering for added realism

CODE	ITEM
TR/506	TruCorp AirSim Advance Combo Manikin

TruCorp AirSim Child Manikin

- The TruCorp AirSim Child, which has been developed in conjunction with the Children's Hospital Los Angeles is based on true CT data
- This anatomically correct 6 year old has both realistic and anatomical features, perfect for practising basic paediatric airway management skills
- The AirSim Child provides realistic feedback during airway management procedures including bag/mask ventilation, supraglottic airway insertion, both naso and orotracheal intubation
- Realistic external and internal anatomical features allow for easy and successful demonstration of all paediatric video laryngoscopes
- A tongue bulb to illustrate tongue edema
- Missing frontal teeth to illustrate realistic dentals of a six year old
- 'Real feel' skin covering for added realism
- This model is ideal for a range of training including: Double naso-tracheal intubation. Bag and Mask ventilation techniques. Full range of supraglottic devices. Direct and video laryngoscopy. Endotracheal tube insertion.

Prestan Professional Manikins**The future of CPR/AED training manikins!**

Realistic to the eye and the touch, the Prestan Adult Professional Manikin is unlike any other on the market. Available individually or in convenient multipacks of four for class training purposes, Prestan manikins are uniquely designed as a clamshell that accommodates an easy-to-insert face shield/lung bag.

Prestan's revolutionary new CPR Rate Monitor allows for instant feedback to both instructor and student regarding the rate of chest compression. This allows each student to gauge their rate of compressions on their own as well as allowing the instructor to monitor several students quickly and easily.

With their patented face/head tilt, the Prestan Professional Adult Manikin simulates the way an actual patient's head would move if they required CPR. In addition, the unique construction of their manikins incorporates a clicking mechanism to help them use the correct force to compress the chest to the correct depth.

CPR MONITOR ALLOWS FOR INSTANT FEEDBACK**Prestan Manikin Family Pack
2 x Adult, 2 x Infant, 1 x Child**

- Realistic looking adult, infant and child versions of the Prestan Professional Manikin in a carry bag
- Allows each student to observe a true chest rise
- Face shield is secured so it won't slip
- Easy-to-insert face shield lung bag speeds setup of the manikin
- Gives each student a realistic experience
- Full chest rise and lung bag ensures that students receive the most accurate and realistic training
- Helps students take the CPR learning experience seriously
- Clicker mechanism in order to ensure students are giving adequate chest compressions
- Head/tilt chin lift in order to teach students how to open an airway
- Includes CPR LED Monitor

Prestan Professional Manikin Family Pack Includes:

- 2 x Adult Manikins with CPR Monitor
- 1 x Child Manikin with CPR Monitor
- 2 x Infant Manikins with CPR Monitor
- 20 x Adult Face-Shield Lung Bags
- 10 x Child Face-Shield Lung Bags
- 20 x infant Face-Shield Lung Bags
- 1x Instruction Sheet and Nylon Carrying Case

Basic Casualty Simulation Kit

- A basic casualty simulation set representing excellent value
- Ideal for First Aid training sessions/exams
- Compound fracture with blood reservoir/pump
- 12 assorted stick on lacerations and open fractures, 1 casualty simulation wax, 1 packet of broken plexiglass and 1 bottle of coagulant makeup blood
- 1 brown, 1 blue, 1 white and 1 red grease paint
- 1 adhesive stick, 1 sprayer and 2 spatulas
- 2 wooden tongue depressors
- Sufficient powder to make 3.6L of blood

CODE	ITEM
TR/700	Basic Casualty Simulation Kit

Advanced Casualty Simulation Kit

- A comprehensive deluxe casualty simulation set
- 60 stick on assorted lacerations and open fractures
- 2 tibia & 2 humerus bleeding moulages with pump assemblies
- 1 palette, 1 mirror, 1 scissors, 1 measuring cup, 1 spatula. 2 sprayers, 2 casualty simulation waxes, 2 adhesive sticks
- 2 bottles of coagulant makeup blood, 1 blood thickener, 2 fake dirt, 1 glycerin (for perspiration), 1 cold cream, 1 mineral oil, 1 charcoal
- 3 latex compounds, 2 petroleum jelly, 2 pressure sensitive tape, 1 white & 2 dark modelling paste
- 2 red, 2 blue, 2 brown, 2 yellow, 2 white and 2 black flash makeup liners, 2 cotton balls, 2 swab sticks, 2 tongue depressors, 2 tissues, 2 makeup sponges
- Sufficient powder to make 10.8L of blood
- Originally designed for use by the US Army
- Dimensions: 41 x 33 x 56cm

Skeleton Model with Muscles and Ligaments

- Over 600 hand-numbered, labeled details
- Hand-painted muscle origins and insertions
- Flexible spine and ligaments
- Slipped disc between the 3rd & 4th lumbar vertebrae
- Protruding spinal nerves and vertebral arteries
- 3-part assembled skull with inserted teeth
- Made from durable, unbreakable synthetic material
- Top quality, life size natural casting
- Close to the realistic weight of around 200 bones
- Final assembly carried out by hand
- On a stable metal stand with 5 casters (painted white)
- Can be removed from stand
- Full flexibility of limbs on left side, right side has full flexibility of knee and hip with limited flexibility of elbow and shoulder

CODE ITEM

Act + Fast Anti Choking Trainer

Act+FastTM
Choking Rescue Trainer

The Act+Fast Anti Choking Trainer is worn by students in CPR class to learn the Abdominal Thrust Manoeuvre (Heimlich).

When performed correctly, a foam plug shoots into the air, making instruction realistic and leaving students confident.

The Act+Fast Red Trainer also includes a foam back slap pad to allow students to practice backslaps as recommended by the UK Resuscitation Council and practice choking rescue protocols as indicated by the American Red Cross and European Resuscitation Council.

Supplied with BackPad, Carry Bag and 10 Spare Plugs

CODE	ITEM

citizenAID

Many people across the country have prepared themselves to know what to do when someone collapses with a heart attack. But being able to act effectively after serious injury from bomb blast, gunshot and stabbing requires different knowledge and skills. Quick actions in these situations, particularly to stop bleeding, will save lives.

The citizenAID Pocket Guide is a clear and simple series of immediate actions. YOU can be the person to provide information to the emergency services, to help organise others at the scene and to give life-saving care while waiting for the professionals to arrive.

citizenAID is grounded in deep and practical experience. The underpinning concepts have been tried and tested in numerous multiple casualty incidents involving blast and gunshot casualties during conflict. The treatment recommended reflects those skills that can be applied by people without medical training to save lives.

citizenAID Pocket Guide

- Clear and simple guide for immediate actions to help save lives from a major incident such as a shooting, stabbing or bombing.
- Helps organise others at the scene and give life-saving care.
- Developed with emergency services, cross-government agencies.
- Be prepared. Learn the system. YOU can save lives.

Emergency Response Drivers Handbook - 2nd Edition

- The Second Edition of this important book on emergency driving in the ambulance service has been completely revised and updated
- An essential resource for those either involved in the delivery of ambulance driver training or who are about to undertake an Ambulance Service emergency response driver training course
- Written by the staff who developed the most recent national driver training standards
- Provides a summary of the standards and practices expected of a driver of an ambulance service vehicle, for both emergency and non-emergency use.
- Designed so that it can be used for self-study, either before or during a course, this handbook is also ideal as a ready reference afterwards in order to maintain skill levels
- Replaces the IHCD Ambulance Service Driver Training Manual
- Published September 2014 with 52 pages, paperback

CODE	ITEM

JRCALC / UK Ambulance Services Clinical Practice Guidelines 2016

- The 2016 Clinical Practice Guidelines provide guidance for NHS paramedics; although the principles are applicable to the work of all pre-hospital clinicians
- The guidelines have evolved from locally-derived guidance (mainly developed using non-systematic approaches) to systematically-developed national clinical practice guidelines developed to universally agreed standards based on current best evidence
- Reviewed on a five year cycle and developed or updated, based on systematic reviews of the evidence and consensus agreement giving you piece of mind you have the most up to date guidelines
- The guidelines are an important part of clinical risk management and ensure uniformity in the delivery of high quality patient care and as such, they form the basis for UK paramedic practice, training and education
- Also available in pocket book format, providing the guidelines in a portable format for vital reference on the move
- A4 version published March 2016
- Pocket book version published March 2013

PHTLS Trauma First Response

- Provides comprehensive, evidence-based trauma guidelines to help you confidently manage trauma patients in the critical moments before EMS arrives on the scene
- Helps you provide the most effective pre-EMS trauma treatment
- Culled from the most current, evidence-based trauma treatment guidelines published in NAEMT's internationally renowned Prehospital Trauma Life Support (PHTLS), 7th Edition
- It's the perfect book for first responders, police, officers, firefighters, rescue personnel, and safety officers
- This proven approach to trauma management can assist you in providing the best pre-EMS trauma treatment to reduce patient morbidity and mortality
- Contents
 - Introduction to PHTLS
 - Mechanisms of Injury and Kinematics of Trauma
 - Assessment of the Scene and Patient 4 - Airway and Breathing Shock
 - Disability - Brain and Spine Trauma
 - Musculoskeletal Trauma
 - Burn Trauma
 - Environmental and Wilderness Trauma
 - Special Populations: Pediatric and Geriatric Trauma
 - Disaster Management
 - Golden Principles of Prehospital Trauma Care
- Published in 2011 with 370 pages, paperback

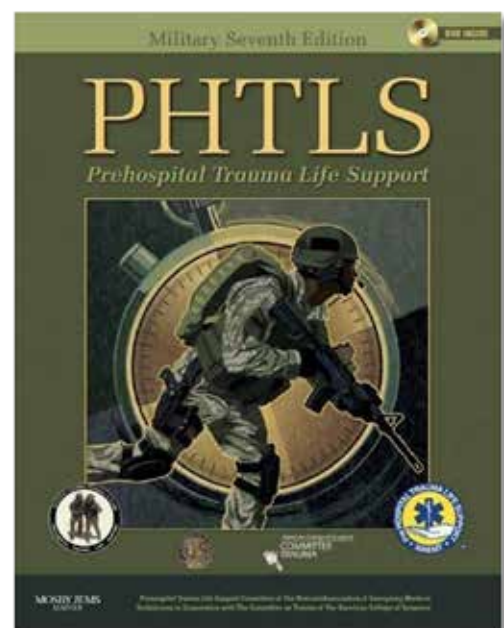

CODE	ITEM

PHTLS Textbook Military Version

- Emphasizes anatomy and physiology, pathophysiology, assessment and management of trauma to key body systems and organs
- Comprehensive, covering ALL aspects of prehospital trauma
- Information on Prolonged/Extended Transport added to all applicable chapters.
- Expanded chapter on explosives and other weapons of mass destruction
- 7th Edition published in December 2010 with 816 pages

CODE	ITEM
BO/432M	7th Edition PHTLS - Military Version

PHTLS Textbook - 8th Edition

PHTLS: Prehospital Trauma Life Support, Eighth Edition is the next step in the evolution of the premier global prehospital trauma education program. For three decades, PHTLS has improved the quality of trauma patient care and has saved lives. The Eighth Edition of PHTLS continues the PHTLS mission to promote excellence in trauma patient management by all providers involved in the delivery of prehospital care through global education.

This legendary program was first developed by the National Association of Emergency Medical Technicians (NAEMT) in the early 1980s in cooperation with the American College of Surgeons Committee on Trauma (ACS-COT). Its medical content is continuously revised and updated to reflect current, state-of-the-art knowledge and practice. PHTLS promotes critical thinking as the foundation for providing quality care. It is based on the belief that EMS practitioners make the best decisions on behalf of their patients when given a good foundation of knowledge and key principles. The Eighth Edition of PHTLS features a new chapter, Physiology of Life and Death. This chapter creates a solid understanding of the physiology of life and pathophysiology that can lead to death. This understanding is essential for the prehospital care provider if abnormalities are to be found and addressed quickly in the trauma patient.

- **Clear Approach to Assessing a Trauma Patient**
- In the field, seconds count. PHTLS teaches and reinforces the principles of rapidly assessing a trauma patient using an orderly approach, immediately treating life-threatening problems as they are identified, and minimizing any delays in initiating transport to an appropriate destination.
-
- **Dynamic Technology Solutions**
- World-class content joins instructionally sound design in a user-friendly online interface to give instructors and students a truly interactive and engaging learning experience with:
 - eBook
 - Video Demonstrations of Critical Skills
 - Interactive Lectures
- Published in November 2014 with 736 pages, paperback
